- Up to 100 treatments in 1 jar (10g)

# NIKK MOLE

The range of Nikk Mole Brow Henna consists of 8 colors, each in an individual glass bottle with holographic shimmer. Each bottle has 7g of Henna.

Each bottle comes in a carton box and includes a glass bottle and a silicon lid with a nozzle-measurer.

Before use, take off a clear cover on the top of the bottle (move it to the side pulling the metal cover bit as well).

To put a nozzle on a bottle, squeeze it a few times in your hands to warm up the rubber, take the cover of the nozzle off and attach to the bottle. It should go all the way down making shure there are no gaps.

When you need to measure the ammount of Henna you need, take of the cover of the nozzle, and simple press on the nozzle with two fingers. It will squeeze 1 drop of henna. 2 presses on the nozzle - 2 drops of henna.

1 squeezed drop of henna  
3 drops of water

Milk consistancy  
Very light stain on the skin

2 squeezed drops of henna  
3 drops of water

Soy sauce consistancy  
BEautiful stain on the skin and  
great color in hairs

3 squeezed drops of henna  
2 drops of water

Sour cream, thick consistancy  
Bold stain on the skin  
Tattoo-effect

# INSTRUCTIONS

1. *Cleanse the eyebrows gently and remove all the make-up*
2. *Exfoliate the brow area using a pea size for each brow with the NIKK MOLE Brow Scrub. This will allow an even application and the Henna will penetrate the skin better.*
3. *In a non-metallic container mix the Henna (the amount equivalent to 2 rice grain) with 5-8 drops of distilled or sterile water to achieve soy sauce consistency. Mix thoroughly.*

**To visualise the consistency we divide it into 3 groups:**

- **Milk consistency** (very runny) - usual Henna in that consistency will only tone the hairs but won't give the bold stain
- **Soy sauce consistency** (a little thicker) - its your perfect working consistency, will give great tone to the hairs and will also amazingly stain the skin
- **Sour cream consistency** (very thick) - great for those who want a bold tattoo effect.

*You can adjust the thickness by adding more water - the more water you add, the more natural looking will be the result.*

4. *Smoothly apply a light coat of your Henna mix using a synthetic brush on the skin and hairs and create a soft ombre effect. try to avoid making spots and gaps, spread the color evenly.*

5. *For a well-defined and bold result you can apply the henna in several layers.*

6. *Application time is from 10-15 minutes depending what result you would like to achieve. You don't need to wait until NIKK MOLE Brow Henna dries completely. The henna can be removed even half dried.*

7. *Gently remove the Henna using water or a Brow Oil. Brow hairs are very delicate and you need to make sure you do not scrub the area.*
