

KEY FEATURES

- 20% lighter than the competition
- Snug and proper fit
- Non-slip and non-marring rubber padding
- Designed for use with Type II, I, IA, and IAA Extra Heavy Duty extension ladders
- Meets compliance standards OSHA 1910 & 1926
- Made in U.S.A.
- Product weight: 10.5 lbs

The Step-Straight Extension Ladder Walk-Thru is designed to fit most ladder profiles in the market, fully compatible with ladders from Type II to Special Duty Type IAA. The Step-Straight utilizes a dual clamping safety lock system which improves stability when accessing the handrails of the Walk-Thru. The height of the Step-Straight allows for easier compliance with the proper ladder elevation above the walking surface, which is 36".

The Step-Straight also has a wide base with non-skid rubber padding that increases the contact area on the work surface while transitioning to an elevated walking surface. The non-skid rubber padding also protects against the damaging of gutters, etc. The Step-Straight is compliant OSHA 1910 and 1926.
