NEXTGEN LIFT & LOCK™ ROOF HATCH OPENER

Installation Options

Installation of Lift & Lock is easy with a few simple hand tools. A typical installation takes about 2 hours for the first one and then 1½ hours for subsequent units.

Option #1 Self-Installation (Using your own Mechanical or Roofing Contractor)

- Send us a completed Lift & Lock Measurement Form to assure we ship the correct model.
- Send us photos of:
 - Bottom section of ladder
 - Mid-section(s) of the ladder
 - A closeup of the top section of the ladder with door closed
 - A closeup of the top section of the ladder with the hatch door open from the ground
 - A closeup of the top section of the ladder with the hatch door open from the roof
- Review our installation instructions and call with questions.
- Let us know when you plan the installation so we can be readily available via phone.
- Follow the installation instructions and call with questions.
- Make sure the installer has a harness and a clip to clip onto the ladder for fall protection.
- Complete the installation and test the opening and closing for proper operation.

Option #2 Hire a contractor

We may be able to recommend one in your area to perform the installation.

Option #3 Factory Installation

If we can't recommend a contractor for you, factory installation is \$500 plus travel. Travel costs are currently approximately \$1,000 to \$1,500.
