NEXTGEN MIGHTY-LITE™ FIXED LADDER

PRODUCT FLIER

Mighty-Lite™ Aluminum modular ladders are permanently attached to any structure and create safe and reliable access to a multitude of high elevation points including rooftops, mezzanines, rooftop hatches, and elevated platforms. Weighing about one pound per foot, they can often be installed without a crane. Mounting is easy using “L” shaped aluminum mounting brackets and if needed, stainless-steel mounting plates to fasten to corrugated wall panels. Their modular components make for easy installation. Corrosion resistant materials assure a long life. Our fixed ladders are in stock and ready to ship!

Features

- Meets OSHA Standards and building codes
- Easy to install with optional adjustable legs
- Modular components for a short lead time
- Flat packed for ease of shipping

Materials

- Aluminum components
- Stainless-steel hardware
- Light weight for easy installation
- “L” brackets for standoffs (If needed)
- Stainless-steel plate to fasten to corrugated panels (Optional)
- Adjustable feet for solid ground support (Optional)

Installation

- Bolt ladder sections together using splice kit (Included)
- Cut ladder to size
- Attach standoff “L” brackets to ladder
- Attach walk-thru handles or platform at top of ladder
- Attach adjustable feet to ladder (Optional)
- Attach standoff brackets to wall using mounting hardware (Mounting hardware not included)

Regulations

Meets or exceeds: SCAL-OSHA 3277; OSHA 1910 Subpart D; OSHA 1926 Stairways & Ladders

NEXTGEN MIGHTY-LITE™ FIXED LADDER

Configurations

Several options and configurations are available for your modular ladder system.

NOTE: The latest OSHA codes require all fixed ladders above 24' in height must be equipped with lifelines. For a **complete** fixed ladder solution, check out our Fixed Ladder Lifelines.

The SecuRope™ Fixed Ladder Lifeline System (FLLS) acts as a lifeline connector for ladders on buildings, water towers, masts, and industrial applications. This system uses stainless steel cables and adapts to all ladder types, round or square rungs. The glider opens to enable travel over upright stanchions without being removed using a twin safety mechanism.

Lifeline System Features:

- Shock absorber integrated within glider
- FLL mounts easily to existing ladder
- Standard tools needed
- Overpassing anchors
- No deformation of intermediate anchors
- Available in various and custom lengths
