The Penetrator Multi-Plus by Tie Down Safety is the simplest mobile fall protection cart for your concrete job site. When used on concrete, this roof cart offers protection for up to 4 workers, 2 in fall arrest and 2 in fall restraint. When used on a non-concrete surface, up to 5 workers can be protected, 3 in fall arrest, and 2 in fall restraint. The Multi-Plus comes with detachable ballast plates which allows use on concrete. Customers have the option of disengaging the penetrator mechanism to tailor their approach for multiple applications. Reuse this lightweight safety cart even after fall arrest. The durable construction holds tear-off debris, decking materials, and other roofing materials when not in use. The Penetrator Multi-Plus' 11-gauge, steel tube handle, 30" x 72" (W x L) construction, and 18" heavy-duty flat-free tires make a durable roof cart for all your needs. This cart also features a dead-man brake, anti-turning pin, and 2,000 lbs capacity. Tie Down Safety maintains high standards and quality control through quality raw materials and components made in the USA.
