The Paper Test

Your ring should fit your finger comfortably; snug enough so that it will not fall off, but loose enough to slide over your knuckle.

TIP: Finger size changes depending on time of the day and the weather, for better results.

Measure your finger at the end of the day and when your fingers are warm. (Fingers are smaller in the early morning and when cold.)

TIP: Avoid using string or paper to measure ring size as these materials can stretch or twist, yielding an inaccurate measurement. AIM for a comfortable, snug fit.
