HANDCRAFTED HEIRLOOMS LASTING A LIFETIME

Wine Bottle Stopper Care Instructions

Tips to lengthen the life of your heirloom Wine Bottle Stopper for many years!

It is **not** necessary to apply Wood Conditioner or anything at all to the wine bottle stopper. Each Wine Bottle Stopper has over 40 coats of high gloss finish. There should be very little to no wear with normal use.

CLEANING

Sponge with warm water to clean your wine bottle stopper. Do not put in the dishwasher. DO not clean with alcohol or finger nail polish remover (acetone), alcohol will fade, dull the glossy finish and remove the finish if heavily used. Do not use a brush or scraper, especially anything metal to clean, this will leave markings on the finish.

DRYING

it is important to keep the wine bottle stopper dry. Dry the surface immediately with a dry towel. Then allow to air dry on a rack, must air dry on a rack do not lay on towel as the towel will trap the moisture.

STORING

Keep your wine stopper away from heat, such as the stovetop. Do not let the wood stay in contact with water or damp surfaces.
