

THE DURABILITY YOU REQUIRE AT A COST YOU CAN AFFORD

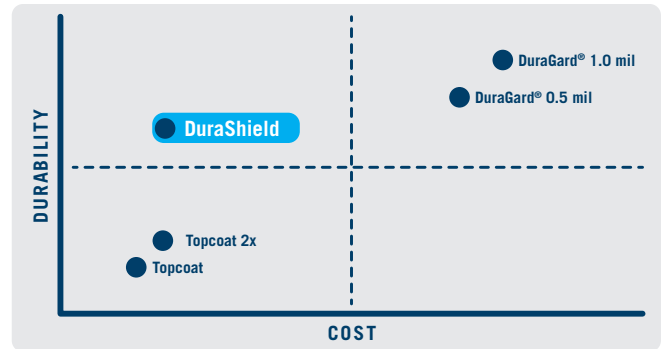

Cost is no longer a reason for education, corporate, government and other ID issuers to settle for less durable cards. Datacard® DuraShield™ clear overlay delivers the phenomenal durability and affordability you've been seeking.

Revolutionary, Affordable Coverage

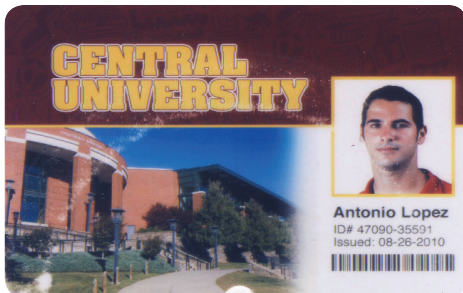

Datacard DuraShield clear overlay delivers phenomenal durability and affordability to ID card issuers. Unlike other products available today, DuraShield overlay combines long-lasting strength with exceptionally low costs over the life of the card. Offering multi-year protection typically associated with premium products, it's as affordable as basic topcoats.

Increased Durability

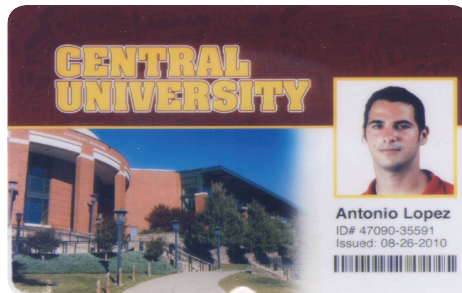

Extensive research and development led to the invention of this clear, edge-to-edge overlay that provides a barrier against chemicals, moisture and abrasions that can result in costly card re-issuance. DuraShield overlay offers four times the protection of a standard topcoat and unprecedented card life for an overlay when used on recommended composite cards.

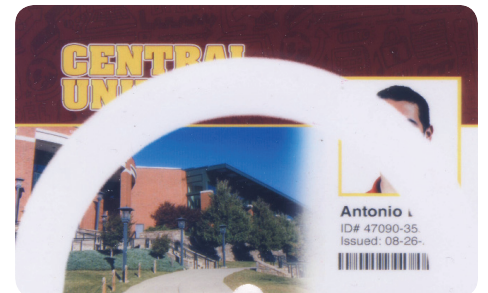

DuraShield overlay far surpasses topcoats in strength — at a price that's far less than other high-durability overlays.

DuraShield™ — 2,000 cycles

1/2 mil Patch — 2,000 cycles

Double Topcoat — 2,000 cycles

Industry standard taber testing shows that DuraShield clear overlay offers far superior performance compared to standard topcoats and similar durability to high-end patches.

Stronger Security

Unlike clear polyester patches, DuraShield overlay provides a highly secure defense against card alteration with full edge-to-edge protection that is virtually impossible to remove intact. The durability and resilience of this overlay helps preserve the integrity of photos, text and other critical ID elements.

Polyester patch coverage

DuraShield clear overlay coverage

DuraShield clear overlay

DuraShield clear overlay comes extremely close to the performance of a polyester patch — but with far greater security and much better aesthetics.

Investment Protection

DuraShield overlay features Datacard® patented Intelligent Supplies Technology™, eco-friendly biodegradable cores and is certified to work with Datacard® desktop laminating printers. Protect your investment in Datacard solutions by choosing only genuine Datacard® Certified Supplies through authorized distributors.

Specifications

Part Number	Printer	Yield
508754-001	SP75 Plus	500
508755-001	CP80 Plus	500

Printer Usage: DuraShield overlay can be used in the SP75 Plus and CP80 Plus printer with the following firmware or greater installed: Firmware 54_90_0_1.176

Ribbon Requirements: DuraShield overlay requires the use of a print ribbon with T-Panel

Card Type: DuraShield must be used with a PVC Composite Card

Nominal Dimensions (per roll)

Height: 2.6 inches (66.0 mm)

Outside Diameter (rolled): 2.5 inches (63.5 mm)

Length (unrolled): 185 feet (56.4 m)

Note: Measurements are approximates

Recommended Storage

Temperature: 32 - 77°F (0 - 25°C)

Humidity: 40 - 60% RH (non-condensing)

Sunlight: Do not store any supplies in direct sunlight or near a heat source
