

EasyLobby® Administrator

EasyLobby® Administrator
is a central administration software module.

Overview

HID Global's EasyLobby® Administrator is a central administration software utility that allows users to perform database administration, as well as real-time monitoring and reporting functions. With each copy of EasyLobby Secure Visitor Management (SVM) software purchased, a free copy of Administrator is included.

Key Features:

- Create and manage your organization's badge templates, by category.
- Create and manage all of the user accounts for the guards or receptionists that will be operating the SVM badging software in each lobby.
- Setup and manage an automated, scheduled employee import process, ensuring the visitor list is always updated.
- Manage all settings and options on each SVM badging station from the central administrator console.
- Setup and manage EasyLobby's Secure Visitor Management eKiosk™ self-registration and eAdvance™ pre-registered software.
