FARGO® ID Card Printer/Encoders

HID®

FARGO® HDP8500

FARGO® DTC4500e with lamination

FARGO® DTC5500LMX all-in-one printer with wasteless lamination

FARGO® HDP5600 with lamination and dual card input hopper

FARGO® HDP5000 with lamination

First choice in government-to-citizen programs worldwide

Flexible ID Personalization Solutions

With more than 35 years of manufacturing excellence and over 250,000 systems shipped, HID Global's industry-leading FARGO® ID Card Personalization Systems are at the heart of the majority of the world's secure ID programs.

Government organizations around the world are leveraging the power of identity card-based applications to help streamline operations, improve efficiency and enhance security. These applications require an increasingly higher quality of ID card — more capable, more durable, more secure. Designed to meet this specific need, HID Global's FARGO card printers and issuance systems are proven in the industry, with over 85 patents and the support of a global team of ID security specialists.

The industry choice for outstanding performance, versatility and security, FARGO card printers and encoders are designed for ease of use, flexible operation and maximum value in every type of Government ID application, from basic photo IDs to advanced biometric technology cards.

Highest-performance secure ID printing portfolio

The FARGO portfolio of high-performance security printers for government provides options for every size and scale of project.

- Professional and modular, HID Global FARGO Direct-to-Card™ (DTC®) printers, laminators and encoders offer small- to mid-sized regional and local government agencies and organizations an array of flexible options to design the ideal card printing system to meet their needs. For mid-to-large government organizations, the DTC5500LMX all-in-one printer and wasteless lamination solution delivers high-volume lamination at an ultra-low cost-per-card. Versatile and easy-to-use, FARGO DTC printers can operate standalone or securely networked together to produce greater volumes of cards.

- The FARGO High Definition Card Printer/ Encoders with lamination — HDP5000, HDP5600 and HDP8500 — deliver the latest and highest capabilities in print quality, reliability, durability and security. High Definition Printing™ (HDP®) technology provides superior print quality, even on cards with embedded electronics.

WHY GENUINE HID®?

- Global leader in secure card issuance
- Over 35 years of manufacturing excellence
- 250,000+ systems shipped worldwide
- Leader in desktop High Definition Printing™ (HDP®) printing technology
- Flexible options for every program

Versatile options

HID Global's FARGO printers and encoders offer a wide range of options to serve the needs of all types of government organizations, from entry level to mid-range or large-scale national deployment. Delivering high capacity, fast throughput, durable results and reliable, rugged performance, FARGO products are easy to use and affordably priced while their flexible, modular design adapts easily to changing needs.

Government customers can choose from multiple security options, from basic photo ID needs to the highest security credentials. FARGO printers and encoders incorporate a broad range of visual security features, such as the LaserCard® Optical Security Media (OSM) stripe or the vanGO® One-2-One™ metallic patch, to protect the integrity of the card at every stage of issuance by limiting access by unauthorized individuals.

The HID Global FARGO printer line supports centralized or decentralized deployments and includes options for challenging environments such as remote or small locations. These flexible options can be customized according to the availability of budget or access to technical resources.

Genuine HID

With Genuine HID, customers benefit from the broadest product line of trusted, fully interoperable secure identity solutions in the market. Genuine HID solutions are designed and built in ISO 9001 certified facilities; include worldwide agency certifications; and are backed by global product warranties.

Supported by industry-leading expertise and the strongest delivery and response platform available, Genuine HID solutions reinforce the long-standing trust that when customers purchase from HID Global, they are investing with absolute confidence.
