SOUNDS LIKE YOU'RE THERE

SONIC PRESENCE ™

Thank you for your purchase!

SonicPresence® makes recording great audio accessible to everyone. After 50 combined years of working in studios and on film sets, we understand the challenges of traditional audio production. The SP15C takes care of all the technical know-how for you. Just wear it on your ears, plug it in, and record exactly what you hear. Listen back – It Sounds Like You're There!

- The Sonic Presence Team

Dynamic Range (at 1kHz)	**110dB**
Weight Sensors	**21g (0.7oz)**
Operating Temperature	**-18°C (0°F) to 57°C (135°F)**

LEGAL DISCLAIMER

Recordings you make with SonicPresence® are strictly for your own personal use. You may not sell the recordings or make use of them for any commercial purpose unless you first obtain the legal permission of the performers and the copyright owners. Doing so without their permission is a violation of the law.

WARRANTY

Visit sonicpresence.com/warranty to read terms. Upon purchase warranty is automatically activated.

SONIC PRESENCE ®

SP15C | USB-C Spatial Microphone
QUICK-START GUIDE

Download this guide and other helpful resources at *sonicpresence.com/resources*

GETTING STARTED

1. Remove SP15C Spatial Microphone from the static protective package.

2. Hang the hook marked "L" over your left ear and the red "R" hook over your right ear.

3. Adjust the fit so the spheres rest comfortably in front of ear and *not inside* your ear (Fig. 1).

4. Use Cable Slider to fasten cables below your chin.

5. When using a cellular-enabled device, switch it to airplane mode.
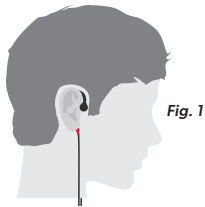

6. Plug the USB-C cable into your SP15C until it seats with a click (Fig.2). Plug the other end into a compatible USB-C device. (see section *Compatible Devices*).

USB-C to USB-C

Compatible USB-C Device
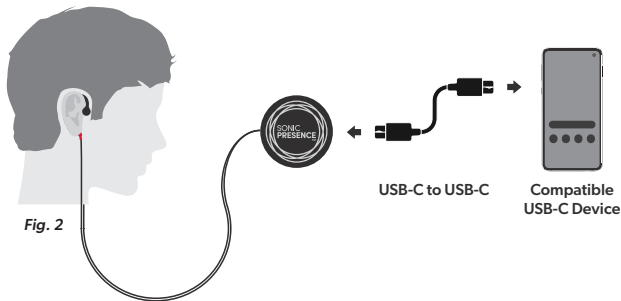

7. Open an application with stereo sound and begin recording (see section *Apps*).
NOTE: Always plug-in first and launch app second.

COMPATIBLE DEVICES

Android® Devices
iPad Pro (USB-C)
Apple® macOS
Windows® PCs

PRO TIP
You can connect your SP15C to older devices that have a USB-A port, including Windows PCs and macOS computers, by using a USB-C Male to USB-A Male cable (sold separately).
