

ConExtra Container Shelf Bracket: Fixed, 3-Tier (22.875")

SB3212
ConExtra Container Shelf Bracket:
Fixed, 3-Tier (22.875")

Single Unit Weight: 14.5 lbs

SB3212 ConExtra Container Shelf Bracket: Fixed, 3-Tier (22.875") was designed in response to the input received from national retail outlets with the goal of making use of high container space while leaving room on the floor for palletized material. The SB3212 is sold as a welded, single 3-tier unit. At minimum, two units are required to build one shelf system. The system is designed to utilize (2) 2 x 12's to create shelves that are 22.875" deep and allows for pallets as tall as 32" to be stored under the bottom shelf (within a standard height shipping container).

This system requires no tools to install, no modifications to the container and can be used time and time again.

Individual bracket arms are rated at 600 lbs., each with a total maximum bracket load of 1200 lbs. A two-bracket shelf provides a gross capacity of 2400lbs.

**Uses (2) standard 2" x 12" boards as shelves (sold separately).
Pressure Treated lumber is not recommended.*

Purchased Product Includes:

- (1) Welded Steel 3-tier shelving bracket
- (1) Steel T-shaped Stabilizer
