The PROTEx folio not only defends your iPad, it makes it more comfortable and easier to hold. Extra edge (bumper) protection is provided by designing the case slightly larger than the iPad. This allows the case’s edges to absorb shock and not your iPad. When folded open, a silicone X-strap provides a confident hold and allows you to easily position the device in vertical or horizontal orientations. The built-in stand provides ideal viewing and typing positions.

Accidents happen. Worry less.

Compact enough for charging carts or your favorite bag, the PROTEx folio is designed to ensure your iPad can survive anywhere.
