

MINI1300

ANTENNA ANALYZER & VNA *with Signal Generator*

Easily check and tune any antenna from 0.1-1300MHz with this rugged, easy-to-use, complete antenna and cable tester.

No more lugging bulky, expensive test equipment to remote antenna sites and hard to get to places.

- Frequency Range: 0.1-1300MHz
- HF/VHF/UHF continuous coverage
- In/Out Impedance: 50 ohms
- SWR Measurement Mode: Single frequency, Scanning (Frequency Sweep), Multi-SWR and Tune SWR
- Other Modes: S11, S21-Gain, Find Frequency, TDR, L/C Meter, RF Generator and WSPR/FT4/FT8/JT65
- Display Modes: Numerical display, curve display, smith chart
- SWR / S11 Connector Type: UHF N-type connector
- VNA S21: SMA
- Calibration: SMA Open, Short, 50 Ohm Load Calibration Kit
- Screen: Capacitive Touch TFT LCD 4.3"
- All capacitive touchscreen on the display – no buttons are needed
- Power Source: USB or Internal Battery
- Maximum charging current: 5V/1.5A
- External Storage Method: TF card (comes with 4GB Card)
