

EASY TO FOLLOW INSTRUCTIONS

1

Remove the heat pad from its wrapper then peel off the paper backing from the sticky side. Apply the exposed sticky part of the heat pad directly to the urine pouch so it sits on the opposite side of the temperature strip between the belt and the pouch.

2

Wrap the Incognito Belt™ around your waist with the pouch against your abdomen. The temperature strip must be touching your skin and the drain tube pointing down. **WARNING: Do not allow the heat pad to lie directly against your skin, it may cause burns.**

3

Do not kink or bend the tubing. The two clips can be moved along the tube to provide convenient access. However, be sure that at least one clip is always closed before moving the other.

4

Once the white clips are in the desired position, clip them closed then cut off the end of the drain tube to your required length.

5

Make sure the temperature is within the specified range of 94°F - 100°F before use. When you are ready to release the urine open the clips. To speed up the urine flow you may apply pressure to the pouch. Once done, ensure you close both of the clips.

MORE INFORMATION ABOUT THE INCOGNITO BELT

This kit is reheatable and can be reheated every day if needed. If not used entirely, your safest bet is to consider the Incognito Belt™ expired 48hrs after you have removed the end plug. Never attempt to refill the bag as it will result in bacterial growth.

MORE INFORMATION ABOUT SYNTHETIC URINE

Our synthetic urine is unisex which means it is intended for both male and female use. It has all the same specifications as real human urine such as uric acid, urea, nitrates and creatinine and is also balanced for pH levels and specific gravity.

The only thing our urine does not contain is DNA. You cannot contract any infectious diseases from this product. Our synthetic urine has a 2-year lifespan from the day it was manufactured. You will find the product expiry date printed on the box.

THINGS TO REMEMBER:

- Never attempt to microwave the device. Only a few seconds will burst the bag.
- The temperature of the sample is very important for the perfect prank. Always use the supplied heat pad. Make sure the temperature strip on the bladder bag reads 94°F -100°F.
- The heat pad may last for up to 10 hours.
- Only use 1 heat pad at a time.
- The bladder bag needs to touch skin to heat up properly.
- This product can't be refilled.

READ THIS INFORMATION COMPLETELY BEFORE ATTEMPTING TO USE THE PRODUCT!

The **Incognito Belt™** is a “gravity operated” prank urine kit that wraps around your waist and is worn under your clothing. It delivers a fake urine sample through a rubber tube. The urine sample is delivered by opening the clips that keep the urine inside the bladder bag.

The **Incognito Belt™** comes completely assembled and ready to use with a maximum waist size of 48”.

The supplied heat pad is the main heating source for the **Incognito Belt™** and without it, the urine pouch will only maintain a temperature of approximately 90°F, therefore the use of the heat pad is necessary to reach the ideal temperature.

- Do not open the heat pad until ready to use.
- The pad will feel only slightly warm to the touch because it runs at 94°F to 100°F.
- It may take anywhere from 15 to 60 minutes to reach the ideal temperature.
- Once opened, the heat pad will have a life expectancy of up to 10 hours.

Note: When the **Incognito Belt™** is worn with the heat pad, it will maintain a temperature of 94°F to 100°F and will never overheat.
