

PLATE COMPACTOR

POWER YOUR WORLD

TPC90H

The TPC90H is Tomahawk Power's most durable forward plate compactor to date. Featuring a cold rolled steel base plate with curved, seamed edges for markless asphalt compaction, the TPC90H Forward Plate Compactor delivers an incredible 3,400 lbs per square ft with its solid, durable steel 22" x 20" base plate.

Built for the professional contractor, its sealed belt cover and robust design provide top clutch and belt protection, while the solid engine frame prevents any damage to the engine from dirt and debris during operation.

Heavily reinforced by a solid roll bar frame and cast iron exciter box, it is still light enough for one person to operate. This is the ideal vibratory plate compactor for compacting landscapes, hardscape, roadways, and asphalt.

SPECIFICATIONS

Engine	Honda GX160
HP	5.5
Compaction of Cohesive Soils	8 in
Compaction of Cohesive Soils	12 in
Plate Size	22 x 20 in
Centrifugal Force	3,400 lbs/ft
Vibration Frequency	90 Hz
Travel Speed	79 ft/min
Water Tank Size	3.5 Gallon
Weight	198 lbs
Package Dimensions	42 x 17 x 37 in

ENGINE FRAME
Provides full protection guaranteeing longer life

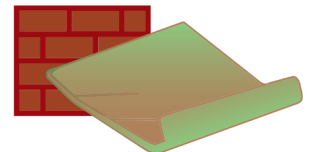

LIFTING HOOK
For quick mobility around job sites

COLD ROLLED STEEL
22" x 20" cold rolled steel base plate for ultimate durability

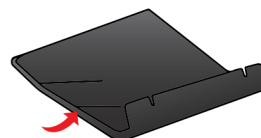

NSK BEARINGS
High frequency, robust exciter box with NSK Bearings for the smoothest performance
