## Airport & Facilities Indoor/Outdoor Equipment Tracking

# BENEFITS

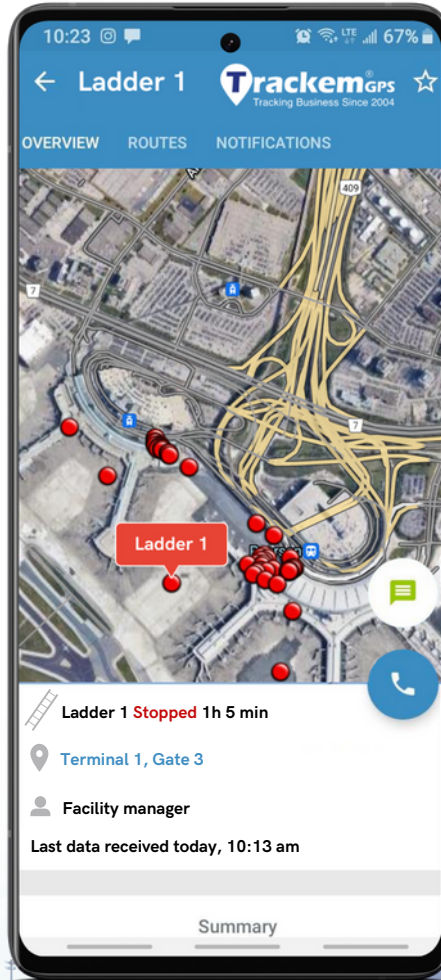

Airports are huge and have hundreds of critical pieces of equipment indoors and outdoors to keep operations running. Keeping track of this equipment can be complicated and costly.

Trackem Facilities Tracking vastly simplifies this without any complex mesh network or IT security intrusions. Simply install the wireless tracker and track equipment, in the terminal or on the apron.

# SPECS

- 3 x AAA Lithium Batteries
- LTE-M/NB-IoT network coverage across North America
- GPS/WiFi/Cell positioning for tracking indoor and outdoor
- 85 x 63 x 24 mm
- Rated IP67 - withstand fine dust, high-pressure spray, submersion for 30 mins in 1m of water, and extreme temps (-30°C to +60°C)
- Zero access to IT infrastructure required

We are a proud Corporate Member of the American Association of Airport Executives
