

RUSTY 70

outdoor floor stand, TC-DSE, IP55, round, rusted iron, Ø/H 19/70 cm, max. 11W

The direct radiating floor stands of the RUSTY series convince by their exceptional rust look. This is achieved by a special chemical treatment of the FeCSi steel used, which produces a controlled rust layer on the surface, which protects the actual material from further corrosion. This makes the luminaires unique pieces and an absolutely special feature wherever they are installed. With protection class IP55, they are suitable for outdoor use. As an option an earth spike as well as a connection box for safe electrical connection are available within the bollard. The electrical connection of the versions available is made to the 230V mains supply.
