

MODEL SPECIFICATIONS (cont.)

	A830i
A Countertop to unit bottom cutout	11 1/2"
B Side to side non-combustible cutout	50 1/4"
C Front to back non-combustible cutout †	19 1/2"
D Control panel width cutout ‡	51 1/4"

† Includes any substrate at front wall of enclosure (in the area the rear of the control panel is to sit flush against). See **SUBSTRATE** section on next page.

‡ Only applicable for enclosures that have countertops with an overhang (see illustration and section below).

Table 3 - Cutout Dimensions

COUNTERTOP OVERHANG

The control panel is designed to sit flush against the grill enclosure front wall. If the **non-combustible enclosure** countertop extends beyond the front wall, creating a countertop overhang, it must be cut flush with the front wall for the width of the control panel or a gap will be created exposing the forward portions of the left and right side grill fire walls. See illustrations above.

ENCLOSURE VENTILATION

FOR YOUR SAFETY, you must provide openings in the grill enclosure for replacement air and ventilation (in case of possible leakage from gas connections or propane cylinders). Failure to do so may result in a fire or explosion causing property damage, bodily injury, or death. See the **GRILL ENCLOSURE / VENTILATION REQUIREMENTS** section for details.
