#### **roomours - Tools for communication**

---

Our products stand for the highest quality craftsmanship and durable and functional design. Behind each of our tools is an idea. It has to take shape, assert itself and prove itself, time and time again. This agile way of working is in the DNA of our products - but above all in the self-image of our company. We place particular value on the personal proximity to our customers and the active exchange with our suppliers, which allows us to quickly and easily realize special requests and individual solutions - but above all on the exciting dialog with the users of our products all over the world.

#### **Form, function and finish**

---

Consciously, our products are based on analog typologies: blackboard, easel, pinboard - made of wood and natural materials. We want to create a relationship between people and their work tools.

We continue to develop and optimize our tools with our finger on the pulse of time. Today, they also provide a foundation for agile and creative work, for virtual meetings and video conferences - and always meet our standards: functional and beautiful, high-quality and intuitive to use. roomours communication tools are carefully crafted pieces - coherent and practical tools for ideation processes, video conferences and collaborative work.

#### **Material and environment**

---

For our tools we use mainly solid wood in oak or ash from domestic cultivation which guarantees a long life and an honest aging process. After many years of use, our products could be sorted, disassembled and recycled - but so that this is not necessary, we still supply all components for products that you have purchased from us.

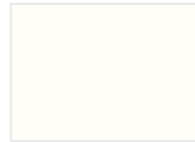

### Powder coated steel

It can be coated in different colors without solvents, is durable and long-lasting and can be recycled after a long service life.

**Writable:** The white boards can be written on with whiteboard markers and dry-wiped.

RAL 9005

RAL 9016

RAL 7030

RAL 7004

RAL 6019

RAL 6018

RAL 5024

RAL 3020

RAL 3015

RAL 2000

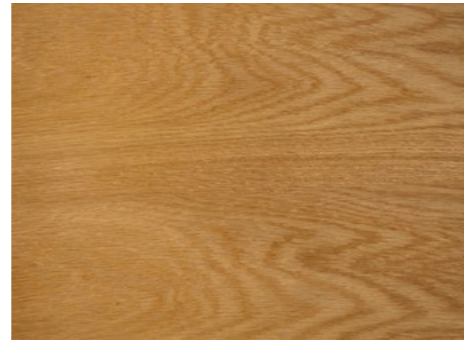

RAL 1018

### High quality solid wood

Wood is a natural material that makes each product unique due to its structure. At the same time, it ages gracefully and darkens slightly over time. The finish with natural oil gives the surface a slightly silky sheen.

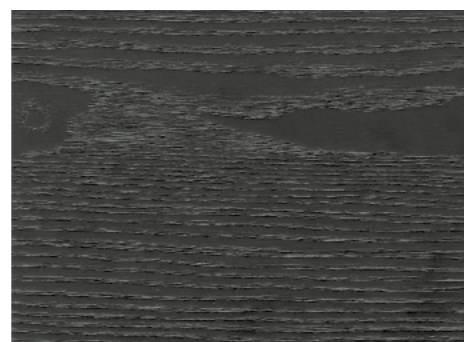

**Environmentally friendly:** renewable and particularly durable raw material.

Oak nature, oiled

Ash nature, oiled

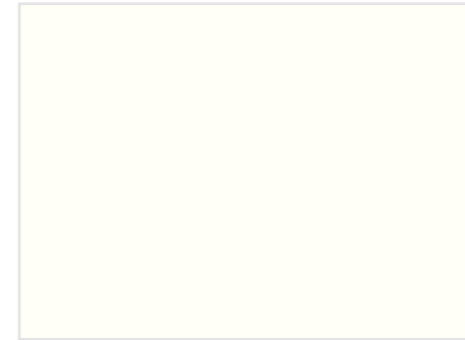

Ash, stained black

### Durable boards

The surfaces of Write It on Tour and Chalk Talk are provided with a writable HPL coating and color-matching edge - an internal metal layer also makes the board particularly magnetic.

**Cleaning:** The white coating is writable with whiteboard markers and can be cleaned wet or dry. The dark coatings are writable with chalk or chalk markers and should be cleaned wet

Signal white RAL 9003

Green, ähnlich RAL 6028

Black, similar RAL 7021

### ESG safety glass

With light tinting in gray, blue or green, the glass boards are always an eye-catcher and still offer sufficient transparency and view despite shielding. ESG glass is very robust and inherently rigid - and is very well suited to light separation. The glass boards can be written on with special glass board markers.

**Cleaning:** Our gasboards can be cleaned very well with water and household cleaners.

Green, transparent

Blue, transparent

Grey, transparent

### Lightweight Materials

Stiff lightweight boards with a resin-impregnated top layer on both sides and a polystyrene foam core. The boards are very easy to pin - pins leave only a small hole, which is hardly visible on the black board. Surface: matt and paper-like.

**Surface:** Matt, Paper-like

Black

White

### Recycled Fleece

PES (polyester, thermoplastic high-performance plastic), contains about 70% already recyclable material and is 100% recyclable and slightly acoustically effective. The material is pinable. The pins leave hardly visible holes in the fleece.

Grey, mottled

### Merino wool felt

Undyed natural felt made of 100% merino wool - a very strong felt with a pleasant surface and with its 8 mm thickness very easy to pin, the needles leave no puncture marks after use.

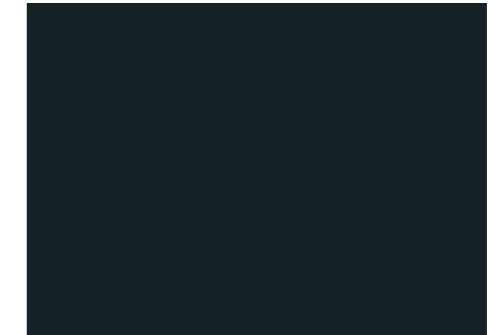

Grey, mottled

### Table tops

Black through-dyed MDF with an anthracite HPL - Fenix coating (anti-fingerprint and high impact and scratch resistance, matt).

Black, similar RAL 7021

# Flipcharts

Whether in a coworking space, home office, hotel or agency - our flipcharts provoke creative exchange. Functional and clear in design, they integrate excellently into different room situations. The flipcharts are available in twelve different colors, in Ash or Oak, dynamically on casters, mobile and space-saving folded or rather classically stable - our flipcharts captivate with their characteristic design and enliven the morn office with their colors.

## Flip It

Flip It is designed so that the screen can be rotated clockwise by 90°. An integrated power strip with three sockets and a 3 or 5 meter power cable provides the necessary connectivity for various forms of digital collaboration. Flip It is especially suitable for the Samsung Flip 55" and 65" models.

### Details without display

# Mobile Boards

Present, moderate, structure. Whether as the basis for equipping design thinking spaces or as magnetic kanban boards for agile teams - a presentation wall is often at the heart of teamwork. This is where ideas and ultimately strategies are developed. To accompany these creative processes, it is a good idea to use presentation walls and thereby make thoughts and processes comprehensible. Our mobile presentation walls are open for your ideas. The panels and boards in various designs provide the framework for your concepts - made of different materials, but always with legs made of solid wood - mobile, stable and timeless. Convince yourself of our presentation walls with their natural character, their variety of materials and their high design standards.

This makes working fun!

## Pin Up on Tour (Whiteboard)

The board made of powder coated sheet steel has a dry wipe surface and can be written on one side with whiteboard markers - the other side serves as a pin board with pleasant haptic material.

Pin Up on Tour was awarded with the IF Design Award 2017.

## Glassworks

The frameless glass boards are open to new ideas. 6 mm strong elegance meets pure function: the softly tinted, transparent ESG safety glass is writable and easy to clean, the wood legs on castors make the board mobile. Width flexible. Thanks to their transparency, the glassboards are also suitable for small width of course for all those who always want to have a clear view.

## Chalk Talk

To write on with chalk or chalk marker, the classic blackboard on four wooden legs is a very familiar tool and at the same time wonderfully mobile and quickly moved away if memories do become too intense. The boards from roomours are clear in design and functional in use with their damp wipe and magnetic surfaces.

## Accessories Post and Pin

Post and Pin responds to any change. Mobile, lightweight and adaptable. Is one board not enough for the collected ideas? - an additional second or third board creates even more space. Thanks to the innovative clamp fitting of the base element, the Post and Pin boards can be quickly exchanged, edited and replaced. The boards filled with ideas can be conveniently positioned and presented on the matching wall rails.

# TV Stands

Whether you hold meetings with teams, Zoom or Google - the TV stands from roomours are the ideal tools to accommodate the necessary equipment for your call, your video conference or for a presentation with customers or colleagues - our TV stands integrate perfectly into different room concepts, are mobile, flexible and above all very stable. The series Front Row, Line Up and Chatterbox can be optimally aligned to your requirements and configured for the most diverse applications.

Front Row

Line Up

Chatterbox

## Front Row – TV Stand

Front Row is the ideal tool for monitors from 45" to 65" and offers enough possibilities to connect different equipment and optional electrification. Front Row fits with its tripod space-saving in any corner of the room and also makes a very good figure. Cameras can be mounted below or above the monitor, and additional elements can be placed on the two shelves.

## Camera mount and electrification

If you want to use Front Row for video conferencing or digital presentations, you can also expand Front Row with a convenient 6-way power outlet. In addition, you have the option of attaching a camera mount with structural screw on the panel of the socket. Excess cable lengths can be conveniently hung on the integrated hook and thus neatly stowed away.

## Chatterbox

Our Chatterbox is designed as a compact monitor stand and allows to mount large monitors or touchscreens up to a screen diagonal of 85" and a monitor weight of 80 kg with a height adjustment range of up to 30 cm. The entire electrification is housed in the actual box and is then covered by a black fleece element. Thus, the Chatterbox can also be placed freely in the room and is thus an attraction from all sides.

# Storage

With the Toolbox and the mobile storage space from the the Line Up series, we now also offer solutions for the better storage and accommodation of materials and tools for your processes. Whether modeling utensils, pens, notation cards or sticky notes, everything should have its place and be available to others after work is done.

**Toolbox**  
mobile utensil container

**Line Up**  
mobile shelf

## Toolbox

All the utensils you use during your workshop, lecture or brain-storming session will find a place here: markers, post it's, index cards, pin needles, magnets, cleaning supplies and much more. The toolbox consists of two elements: The attached utensil container is removable and can be placed on their work tables. The small table on which the utensil container otherwise rests can then also be used individually as a side table.

### Details

## Mobile shelf Line Up

Line Up is the ideal solution for storing all necessary work tools and accessories, magazines, books that may be necessary as a small reference library for development processes. With that greatly simplify teamwork, as the archive and a material magazine can travel from room to room, as it were. Line Up's storage solution is an ideal solution for ideation and design thinking processes due to its narrow and light structure.
