

Yazbek®

At Yazbek we strive to offer textile products of the highest quality, complying with the official Mexican norms.

We contribute to protection and conservation of our environment.

We are a 100% Mexican Company committed to the growth and development of our country.

Mission

We are a textile company that offers the best option on t-shirts and casual wear for embellishment, ensuring quality, service and competitive price.

Vision

To be the first option on t-shirts and casual wear for embellishment under the Yazbek brand in Mexico and Internationally.

Values

We build trust and long term relationships with our customers, suppliers and employees. We are committed with labor, environmental and legal regulations.

Social responsibility |

We engage Yazbek personnel and their families to work alongside us in all activities surrounding the development of our neighboring communities as well as ongoing programs designed to improve working conditions, having a positive impact on our society, and ensuring we operate our business with the outmost respect to the environment.

Education is fundamental for the development of a healthier and more successful society. Every year our **Scholarships Program** honors our personnel's sons and daughters who achieved academic excellence by rewarding them with education funds, school supplies and an invitation as honored guests to see their parents' workspace and get to learn more about their jobs and the company

This program has been very successful in motivating students to stay and excel in school. We continue to see statistics that show a decrease in school desertion, especially for students who quit because of having to economically support their household.

Donation Programs |

In 2023 we had another successful year for “**Abriga una comunidad**” Our yearly campaign in which our goal is to keep neighboring communities in need warm, during the winter. During the campaign more than 1,500 garments and 300 blankets were given to 3 different communities in Guanajuato and The State of Mexico.

For another one of our programs during this year, we teamed up with our workers union and together we were able to deliver **toys to 300 children** in the surrounding communities.

Our goal is to focus on personnel development and improve the communities where we operate. Every action taken is an integral part of our business strategy and goes hand in hand with our public commitment and expands to all areas of the organization, including our workforce, suppliers, and customers.

Yazbek takes care of its people |

Our personnel's safety and quality of life is of the outmost importance, and it is for that reason that we provide **safe, clean, efficient, and free everyday transport** to and from our facilities.

In Yazbek we run different **prevention programs** and make sure that our dining halls serve **healthy, balanced, fresh, and tasty meals**. Prepared with high quality and hygiene standards, at no cost for our employees.

This year we had another edition of the **visual aid campaign**. A special program in which we team up with companies that manufacture eyewear and help our employees get their vision tested. All workers that need to acquire eyeglasses can get them at extremely competitive prices.

We advocate the benefits of maintaining an active lifestyle and practicing sports can be one of the most fun ways to achieve it, that is why this year we celebrated another edition of **Carrera Yazbek**, Yazbek' s own running event in which personnel and their families are welcome to participate and enjoy some healthy competition.

At Yazbek, our personnel is part of our family and we are proud of each individual achievement, thanks to their efforts we are recognized as "a great company in the textile industry".

Sustainability |

We promote the conservation of our natural resources, and we do our part to contribute to the mitigation of the impact our business has on climate change. For example, **we reduce, resupply, and recycle water usage**; we encourage recycling and have reduced 140 tons of CO2 emissions in our headquarters in Mexico City with the installation of a **solar energy system** with 540 photovoltaic panels that generate 78% of the power required for all operations in the building.

We support the future of new generations and avoid the use of single use containers in our hydrating stations. Each of our facilities has a **water purification system** that complies with NOM-127-SSA1-2015 standards; thus, our collaborators consume quality water and we contribute to the care and conservation of the environment.

Regarding the environment, we set goals, objectives and parameters that not only comply with the Mexican Official norms but go above and beyond to carry our operations in a responsible and sustainable manner. Our investment in sustainability allows us to continue supporting important environmental and community projects.

Water treatment plant |

At Yazbek we are always at the forefront and committed to the environment, changing, and adapting **new technology for treatment and recovery of water** used in manufacturing. In 2021, we started the operation of our new plant that allows us to treat water **without generating waste and recovering at least 50% of the vital resource**, which is then reused in the production process and watering our greenhouse where we harvest tomatoes and sweet peppers. Treated water is continuously analyzed in our lab to keep a tight control and comply with our ecological commitment and environmental regulations. These efforts show our confidence in Mexico's future, its economy, and the domestic industry. Yazbek will continue to support the country by investing to generate employment and improve the life of its people.

1

Raw material warehouse

Our warehousing facilities have been designed to create and maintain the required climatic and lighting conditions, in order to guarantee that our raw materials do not undergo alterations. In this manner, we make sure that from the start, our products comply with the highest quality standards in the international market.

2

Weave

We weave the fabric used in making our garments. We have machinery with the highest technology, which is operated by highly trained personnel. In this way, we manufacture fabrics whose structural characteristics fully cover any market demand.

3

Dyeing/Finishing

The automation and strict controls of our dyeing processes are designed to guarantee that our fabrics have longer durability, solid colors, controlled shrinkage in order to offer maximum comfort.

4

Cutting

This process is made with computerized equipment that guarantees precise and reliable cutting, without altering the standards and specifications previously defined. The result is a fully controlled process.

5

Dressmaking

Our manufacturing plants are known for their state of the art technology. Strict control mechanisms are implemented which guarantee the quality of our products.

6

Finished goods warehouse

The warehouse has been designed in order that our garments are kept under excellent packing conditions, until the final delivery to the customers.

The infrastructure for warehousing the finished product allows us to have a wide availability of inventory, thus achieving satisfaction of all our customers.

Decoration techniques |

There are several different embellishment processes. While each process comes with its pros and cons, it is up to the designer or the person in charge of the embellishment to consider the desired outcome of the product and select the adequate process for it.

Discover which ones are the most used ones, in order that your Yazbek garments look fabulous and offer your customers the expected result.

Screen printing

Is a decoration technique consisting on direct transfer of ink to the garment, through a tightened screen over a wood or aluminum frame. This technique allows reproducing the same image thousand times in a fast manner. It is recommended for large volume works because the printing cost is low.

Embroidery

Embroidery is a technique by which a text and/or image is applied directly to the garment using embroidery machinery. It is recommended for cloth works such as pique, flat clothes such as Oxford fabric for our shirts, and twill that is the most popular fabric for our trousers.

Direct to garment

This technique is very versatile since it allows making a sample very fast, although, due to the high cost today, we see small productions made in this manner. The DTG printings are only flat and cannot make volume effects; neither allows using metallic inks. The garment is placed directly in a DTG printer, which is merely an ink jet printer, which naturally, uses textile ink.

Heat transfer

In this process, an inverted image is printed on a paper, later it is transferred to the garment through pressure and heat, using an industrial iron. This technique is very interesting since the touch that the image leaves is perfectly smooth and soft to the touch.

Sublimation

Textile sublimation is a technique used to print 100% polyester garments, it is excellent since it achieves a durable print, with very live colors, regardless of many washes or uses. Printing is done using special inks in ink jet or laser printers. The heat changes the print done on a paper to gas, which penetrates the polyester surface. It can be done in a fast manner starting from small quantities. It allows an almost photographic reproduction without increasing costs.
