

T&O / STOOL

Similar to the T Chair of the same series, the O Stool features a seat three-dimensionally cut out of wood, and the Mid and High models are equipped with a colored foot rest. The oval hole in the center of the seat is provided for easily carrying the stool. The colored steel foot rest and seat shape provide the same familiarity and freshness of the T Chair. It was named an O Chair because it looks like the shape of an "O" when viewed from above.

DESIGN

JASPER MORRISON , 2016

"O Stool is similarly of 3d machined solid wood and the stool mid and high have painted steel tube footrests. The handle, consisting of an elongated hole machined through the centre of the seat is shaped for maximum comfort when carrying the stool. It is also a familiar typology revitalised with improved comfort and new materials."

WARRANTY

We will guarantee the product for two years from the date of delivery of the product. For the content of quality assurance please see the "Warranty Policy" included in the product.

TESTS

ISO7173-L4 / Determination of strength and durability

ISO7174 / Determination of stability

TECHNICAL INFORMATION

WOOD

The wood used in this product is obtained from maple, oak or ash trees in North America that are managed and felled in a planned manner. If required, we can manufacture furniture with the FSC® or PEFC™ certification. In that case, however, longer lead-time will be required to procure the wood.

STEEL

The footrest is made from stainless steel tubes. The surfaces is powder-coated.

GLIDE

The leg tips can be equipped with polyethylene gliders, which are sold separately. You can choose between felt and plastic bottom parts.

VOC

The coating and glue used here reduce VOC emissions in manufacturing processes and finished products. These materials have been tested for formaldehyde emissions in accordance with the ISO12460 standard and confirmed not to exceed the 0.4 mg/l emission level.

PURPOSE OF USE

Indoor

Maruni Wood Industry has established various test standards and designs for comfortable use, however, use of products beyond the expected scope can lead to cracking and snapping of wood parts. There are several things you should keep in mind in order to properly preserve the product and continue using it for a long time. Therefore, be sure to read the instruction manual beforehand.
