# JUICE EXTRACTOR

**MODEL # KW-4207**

Voltage: 230Va.c. 60Hz Power: 350W

## INSTRUCTION MANUAL

## CONGRATULATIONS

You are now a proud new owner of a KYOWA Juice Extractor model no. KW-4207.

Before using for the first time, kindly take time to carefully read your instruction manual. Please observe all safety precautions and follow operating procedures. After reading, kindly store your instruction manual in a safe place for your future reference. Should you pass on this Juice Extractor to a third party, please hand over this instruction manual as well.

## PARTS DESCRIPTION

1. Pusher
2. Lid / Protective Cover
3. Filter Basket and Grater
4. Upper Body
5. Securing Clamps
6. Connector
7. Juice Cup
8. Motor Casing
9. Pulp Cup
10. Switch

## IMPORTANT SAFEGUARDS

When using the Juice Extractor, basic safety precautions should always be followed:

- Always operate your KYOWA Juice Extractor from a power source of the same voltage and frequency rating as indicated on the rating label.
- Do not place unit on uneven surfaces. Place upon a flat area surface and far from the edge of the counter top.
- Do not operate the Juice Extractor if any part including its power supply cord has been damaged. Return the unit to the nearest authorized dealer or service facility for repair.
- Do not operate or place any part of your KYOWA Juice Extractor on or near any hot surface such as gas / electric burner or heated oven.
- Always make sure that the juicer Protective Cover is clamped down securely in place before the motor is turned ON. Do not fasten or unfasten clamps while the juicer is in operation.
- Do not use accessories or any other objects in the Juice Extractor other the ones originally provided.
- Put sliced fruit and vegetable to the Feeding Funnel one at a time. Do not overload funnel or use excessive force to press food through the feeding hole.
- Never use your finger or any other objects to push the fruit or vegetable into the Feeding Funnel. Use Pusher or another piece of fruit or vegetable to push it down.
- If the fruit got stuck in the Cover while the motor is operating, turn OFF juicer and unplug from the outlet. Disassemble juicer to remove fruit.
- Never leave the Juice Extractor unattended when in use.
- Switch OFF and unplug the Juice Extractor from outlet when not in use or before cleaning.
- Hold plug when unplugging from socket. Do not unplug by pulling the supply cord.
- To reduce the risk of electric shock, do not immerse or expose the Juice Extractor to rain, moisture or any liquid.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- This KYOWA Juice Extractor is intended for normal domestic/household use only. This unit is not suitable for commercial use.

## HOW TO USE

- Clamp down Protective Cover into the unit. Make sure securing clamps are safely locked; otherwise, the unit will shut OFF or will not function accordingly.
- Make sure that the Juice Extractor is turned OFF before inserting plug into the power source.
- Wash fruits and/or vegetables then cut into small pieces to fit the Feeding Funnel.
- Use only soft fruits and vegetables. Hard fruits or vegetables may damage the motor and filter of the Juice Extractor.
- Switch Power ON by turning knob clockwise to 1 or 2 depending on the fruit or vegetable you are about to process.
- Insert the chopped fruits and vegetables into the Feeding Funnel and gently push the Pusher down.
- When Juice Cup is already full, switch OFF the unit and empty the container before continuing.
- Vitamins disappear quickly from fruits and vegetables when processed so it is recommended to consume the juice as soon as possible.
- When extracting juice from apples, add a few drops of lemon into the processed juice to keep it from turning brown too quickly.
- Vegetable and fruit pulps after juice extraction can still be used as a base for soups, sauces, jams and desserts.
- Do not run the Juice Extractor for more than 2 minutes at a stretch. Turn OFF and let the unit rest for 1 minute to cool down the motor before turning ON again.
- Switch OFF and unplug Juice Extractor after use.

## CLEAN AND CARE

- Unplug Juice Extractor from the power outlet before putting on and taking off parts.
- Open the Securing Clamps, remove the Protective Cover, Upper body and the Filter.
- Wash movable parts under running water. Never use dishwasher or pour hot water when cleaning the unit.
- Do not use harsh cleaning agents or abrasive objects (e.g. scrubbing pads or metal brushes) for cleaning.
- Use damp cloth to clean the motor housing. Avoid any kind of liquid to seep into the main motor of the unit.
- Pat dry all parts using a soft, dry cloth.
- Put back parts and accessories of the Juice Extractor to their proper places before operating again.

## SERVICE

- Do not operate your KYOWA Juice Extractor if the unit malfunctions or appears damaged in any manner. Bring the complete product to the place of purchase or to any authorized KYOWA dealers for inspection, repair or replacement.
- Do not disassemble your KYOWA Juice Extractor by yourself. No user serviceable parts inside. Refer all needed repair to an authorized KYOWA service facility ONLY.
