STEAM IRON

MODEL # KW-7510

Voltage: 230V a.c. 60Hz Power: 1200 WATTS

INSTRUCTION MANUAL

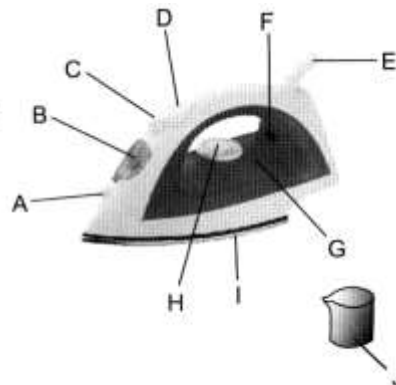

CONGRATULATIONS

You are now a proud new owner of a KYOWA Steam Iron model no. KW-7510.

Before using for the first time, kindly take time to carefully read your instruction manual. Please observe all safety precautions and follow operating procedures. After reading, kindly store your instruction manual in a safe place for your future reference. Should you pass on this Steam Iron to a third party, please hand over this instruction manual as well.

PARTS DESCRIPTION

- A. Spray Nozzle
- B. Water Filling inlet
- C. Steam control turning knob
- D. Spray button
- E. Power cord protector
- F. Pilot light
- G. Water tank
- H. Temperature control dial
- I. Soleplate
- J. Measuring cup

IMPORTANT SAFEGUARDS

When using your iron, basic safety precautions should always be followed:

- Always operate your KYOWA Steam Iron from a power source of the same voltage and frequency rating as indicated on the rating label.
- Do not operate or place any part of your KYOWA Steam Iron on or near any hot surface such as gas or electric burner, hotplate or heated oven.
- Do not operate iron with a damaged cord or if the iron has been dropped or damaged.
- Do not disassemble the iron. Take it to a qualified serviceman for examination and repair. Incorrect reassembly may cause a risk of electric shock when the iron is in use.
- The iron should always be turned to the lowest setting before plugging or unplugging from outlet.
- Avoid touching hot surfaces of the iron during use. Use the handle only.
- Do not leave iron unattended while connected or in an ironing board. Burns may occur from touching hot metal parts, hot water or steam.
- Do not allow cord to touch hot surface. Let iron cool down completely before putting away. Loop cord loosely around iron when storing.
- Switch OFF and unplug the iron when not in use.
- To reduce the risk of electric shock, do not immerse or expose the Steam Iron to rain, moisture or any liquid.
- Keep out of reach from children or from persons with mental or physical disabilities.
- This KYOWA Steam Iron is intended for normal domestic/household use only. This model is not suitable for commercial use.

HOW TO USE

- Before using for the first time, check if the voltage rating on the base plate corresponds to the power outlet in your home.
- Remove all packing materials.
- Clean the iron surface.
- Some parts of the iron have been slightly greased and as a result, the iron might slightly emit smoke when connected for the first time. This however, will cease after you have used the iron for some time.

HOW TO FILL WITH WATER

- Before filling the Steam Iron with water, make sure that the unit is unplugged from the power outlet.
- Turn Adjustable Steam Button and Temperature Control Dial to OFF setting.
- Hold iron in a 90-degree angle then fill tank with water through the Water Filling Inlet.
- Do not exceed MAX line in the water tank of the iron when filling with water to avoid water from leaking.
- Once iron has been filled with water, put iron on heel rest immediately.

SETTING THE TEMPERATURE

- Set temperature by turning the Temperature Control Dial to the following markings:

STEAM IRONING

- Fill iron with water following the instruction in "How to Fill with Water".
- Plug unit into the power supply.
- Set temperature of the Steam Iron to MAX.

- On heel rest, allow iron to heat up for about 2 minutes or until the Indicator Lamp turns OFF indicating that the iron is ready to use.
- Adjust Steam Control turning Knob to the position required by the cloth you are working with.
- The iron may already be used for steam ironing.
- Slowly glide iron along wrinkled areas of the cloth.
- Always put iron to heel rest in-between ironing cycles.

WATER SPRAY

- While ironing, spray water on clothes by pressing the Spray Button.
- When using Water Spray function for the first time, you may have to pump Spray Button several times until the iron releases water.

DRY IRONING

- The iron heats up faster than it cools down so it is recommended to begin ironing the clothes which require lower ironing temperature (synthetic fibre, fabric and silk), than clothes of other materials requiring higher temperature (wool, cotton, jute, and etc.).
- Rest the iron vertically and set the Temperature Control Dial at "MIN" setting.
- Insert the plug into the socket, turn the Temperature Control Dial to the temperature point required by the clothing material and aim the material identity mark at the Heating Indicator. You may start ironing when the Indicator Light turns off.
- Try to iron an old piece of cloth first to check the heating level of the iron.

CLEAN AND CARE

- Turn the Temperature Control Dial to "MIN" setting and then unplug from the outlet.
- Avoid ironing over zippers or rivets on jeans for this may scratch the soleplate.
- When removing the cord from the outlet, grasp the plug rather than pulling the cord.
- Never use abrasive cleaning agents or any metallic and sharp objects (e.g. scrubbing brush or knife) for cleaning.
- Pour out water from the Water Tank after every use.
- Set iron to stand horizontally on its heel, plug unit then set Temperature Control Dial to MAX. Allow iron to stand for about 1 to 2 minutes to evaporate remaining water in the tank.
- Allow iron to cool down completely before storing in a cool and dry place.

SERVICE

- Do not operate your KYOWA Steam Iron if the unit malfunctions or appears damaged in any manner. Bring the complete product to the place of purchase or to any authorized KYOWA dealers for inspection, repair or replacement.
- Do not disassemble the Steam Iron by yourself. No user serviceable parts inside. Refer all service to an authorized KYOWA service facility ONLY.
