

Cycle to Work Schemes

A win-spin-win situation

eBike cycle to work schemes are great for businesses, employees and the planet

eBike to work

Joining one of our eBike to work schemes brings fitness, fresh air and financial savings within reach of more and more companies and people.

Employees

- Enhance your health and wellbeing by cycling to work - it's as hard or easy as you want it to be with our eBikes.
- Save up to 47% on the cost of an eBike with our cycle to work schemes.
- Spread the cost over 12 to 24 months.

Employers

- Offer your staff a great extra benefit.
- Help them keep fit and arrive at work energised.

Talk to us today to find out more and how you can get started.

**FACT: 70% of all car journeys are less than 5 miles.
That can be covered on an eBike in 20 minutes.**

eBikes and Cycle to Work

Spread the expense; spare the exertion

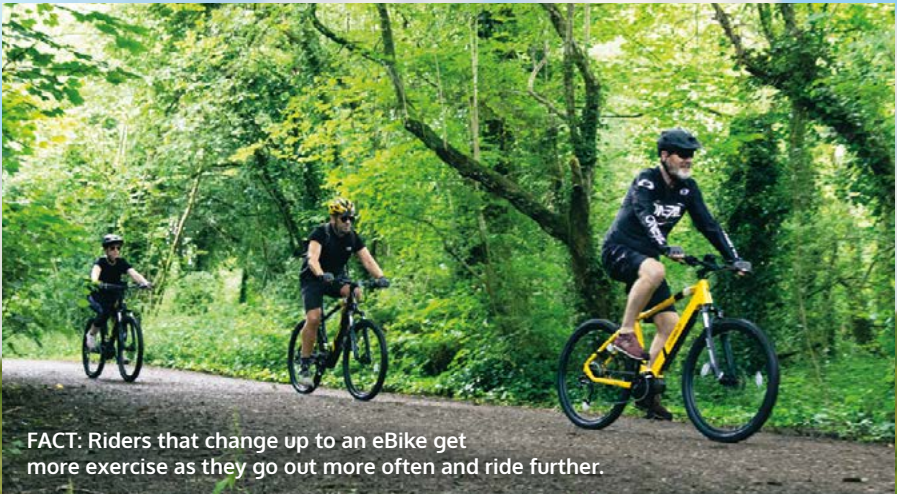

Cycle to work schemes are UK government backed initiatives to encourage businesses to promote healthier and more environmentally friendly commutes by offering their employees bikes.

In simple terms, the employer buys the bike for the employee, regaining the tax-free cost through salary drawdown across an agreed

period, usually 12-24 months.

The employee has immediate use of the bike without any up-front cost, and the employer is able to offer their staff a great additional benefit.

Adding the option of an eBike into this mix brings that healthy and cost-saving commute within the range of far more staff.

FACT: Riders that change up to an eBike get more exercise as they go out more often and ride further.

"My long ride was very much more achievable"

And employers, if you don't have a cycle scheme yet in place, we can help you to set one up.

Please contact us today to get further details or to arrange a roadshow visit.

"A massive life-changing purchase - I am now free from the tyranny of the car"

With the cycle to work scheme, you won't notice the cost; with an eBike, you won't notice the journey!

Did you know?

In addition to our own brand of eBikes, Mark2 Bikes can also supply a wide range of the latest UK specification eBikes together with the provision of servicing and repairs to you and your employees.

"It's a passion and a way of life"

Mark2 eBikes are designed in the UK, hand-built in Europe with Danish electrics, come with a three-year warranty and lifetime support, but their most important component is passion.

We are passionate about the difference that eBikes can make to the people who ride them - the feel, the fun, the fitness, the funkiness - and to the planet on which they ride.

We at Mark2 are proud to be the only Hampshire eBike brand, and proud to supply and support all of those who share our passion and cycle our paths.

Our set-up allows us to offer high quality bikes at price-points hundreds of pounds below other brands, as well as directly supplying, personally supporting and locally servicing our community.

All you need to do, to start sharing that passion, is to go for a ride!

Call us on **01264 316100** or visit **mark2.co.uk**. **ANDOVER SP10 3SJ**
