

Weight Bag Retread

Instructions

Send us your Weight Bags

Gather up your tired, broken weight bags and pack them carefully. We recommend bagging up the weights before packaging, just in case there is any leakage of metal shot. Each package should not exceed 20 lbs. If there are multiple packages, please label them "1 of 2, 2 of 2", etc. **Fill out the pack list completely and include in your package(s).** The shipment should be sent via **UPS or Fed Ex ONLY** to the address below:

Benchmark
Cane Farm Building 7
99 Kingwood-Stockton Road
Stockton, NJ 08559

We take stock of your return - then, you tell us what you'd like to get back.

Once we receive your shipment, Benchmark will take apart your weight bags and weigh the metal shot within. We'll get in touch once we've weighed your return, and you can let us know what sizes you'd like us to make for you.

We make your new bags!

When we are finished constructing your new weight bags, you'll be sent an online invoice. This invoice can be used to check out using a credit card. (Alternate payment methods available upon request.)

You'll receive 25% off of the retail price.
