Mobile Rivet Storage Trolley

Rivet Rocker

The rivet rocker edition has given birth to something special: a timeless classic that elegantly combines durability with extraordinary design. Its unique features are the 500+ rivets which are reminiscent of the golden days of aviation. The charming retro-look lends it an air of sophistication and ruggedness.

Every Trolley is produced on customer request in detailed craftsmanship in our Cologne based manufacture - this creates the Original. Aeroplane trolleys by bordbar comply with the globally recognised ATLAS-Norm, used by Lufthansa and Emirates among others. The materials used in the trolleys must comply with the stringent requirements of the aviation industry.
