Humanscale

Adapted from iconic industrial designer Niels Diffrient's original Smart chair, Smart Conference takes intuitive comfort to a new level of luxury suitable for any meeting space.

Smart Conference shares the same intuitive, ergonomic, and sustainable design as our award-winning Smart Chair. It adjusts instantly to the user's body, providing a perfectly tailored sitting experience for all. No matter their shape or size, each sitter enjoys the same comfort, support, and movement in a chair that feels made just for them.

"A smart chair adapts to your weight and shape automatically, as if the chair were made for you personally."

- Niels Diffrient

With a career spanning more than 50 years, industrial designer Niels Diffrient revolutionized the industry by focusing on the human experience. He developed a deep understanding of how people live, work, and interact with their environments, and created products with timeless forms that solved functional problems as simply and elegantly as possible. Above all, Diffrient put the user first. As he once stated, "the best way to know what people want and need is not by asking them, but by understanding them."

As with all Diffrient designs, Smart Conference emphasizes function. This approach provides a streamlined sitting experience, with unparalleled support for nearly every body type. It also results in a timeless, minimalist, and universally appealing aesthetic, appropriate for any setting.

Healthy, Sustainable, Luxurious
Available in premium, chrome-free leather

Form-Sensing Technology takes on the shape of the sitter's back as if it was custom made for them

Weight-Compensating Recline utilizes the sitter's weight to provide automatic and personalized support in any position without the need for adjusting knobs and levers

Carbon Negative, Free of Red List chemicals and made in a True Zero certified facility

15 Year Warranty
Components and Parts

5 Year Warranty

- Armless
- Fixed Duron Arms
- Fixed Duron Arms with Matching Textile

Caster Options

- Standard
- Soft
- Locking

Cylinder Options

- 5" Standard
- 3" Return Height
- 5" Return Height

Like all Humanscale products, Smart Conference was designed with a positive environmental impact in mind at every stage of its development. For us, the best designs in the world achieve more with less, and sustainability is the natural result of this focus. Smart Conference's lightweight design minimizes the environmental impact of its shipping.

Smart Conference is made for durability and longevity. Its textiles are meticulously selected and tested beyond industry standards to ensure that it performs and looks like new after many years of use. Its modular design allows parts to be easily swapped out and disassemble at the end of its life. As a result, the life of the chair is extended and can be used after its first/original initial life.

Across the board, Humanscale products are free of Red List chemicals. Smart Conference is no exception and is manufactured in a certified True Zero Waste facility, adhering to the industry's highest standards for sustainability.

Smart Conference is exclusively upholstered in Maribo. This European leather was consciously selected for its alternative tanning and semi-aniline characteristics that expose its natural beauty, remaining durable without harmful chromium processing. This contributes to its luxurious look, feel and comfort, the softest chrome-free leather we have ever seen.
