Operation

1. ON/OFF
   Hold ← button long to turn on the power, and hold 0 button long for a second time to turn off the power. When the motor stops driving and when the e-bike is not used for a consecutive 5 minutes, it will automatically shut down and turn off the motor power supply.
2. Display 1
   Hold ← button to start up and enter display 1.
3. 2.1 Turn on backlight and headlights
   Hold ← button long to turn on backlight and headlights (the controller should have headlight drive output function); hold ← button long again to turn off the backlight and headlights.
4. 2.2 Assist ratio gear (ASSIST) switch
   Hold ← or 0 button shortly to switch 1-5 file gear. Gear 1 is for the minimum power, gear 5 is for the highest power. Each startup will automatically restore the gear shutdown last time (the user can set randomly).
5. 2.3 6KM/H assist promotion function
   Hold 0 button and flashes, the vehicle drives at the speed not more than 6KM/H. Release 0 button, the function is invalid.
6. 2.4 THROTTLE display
   Turn on throttle, THROTTLE display.
7. 2.5 PAS display
   When Power-assisted riding, PAS display.
8. 2.6 Cruise function
   After the cruise function is turned on, the trip riding speed is greater than 7 KM/H, hold 0 button long and enter cruise, the CRUISE lit. Brake or hold any button to cancel.
9. 2.7 Bluetooth connection display
   When the mobile phone is connected with the Bluetooth module, the Bluetooth connection signal is on, display.
2.8 Display and delete of single data

After power on for 5 seconds, hold ▲ and ▼ button at the same time, single trip riding time (TM) and single trip distance (DST) flash, hold ▼ button shortly, the content of both is cleared. If failed holding the button within 5 seconds, it will automatically return the display interface after 5 seconds, original content is preserved.

3. Display 2

Hold ▼ button shortly in display 1 to enter display 2. In the riding mode after 5 seconds, display 2 automatically returns to display 1.

4. Display 3

Hold ▼ button shortly in display 2 to enter display 3. In the riding condition, five seconds later, a single maximum speed (MXS) display automatically returns to the real riding speed (KM/H).

5. In display 3, hold ▼ button shortly (SW), and the display will re-enter display 1.

6. Hold ▼ button to turn off the display and the power supply of controller.

7. Automatically prompt interface

7.1 Error Code Display

<table>
<thead>
<tr>
<th>Error Code</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>01_info</td>
<td>Throttle Abnormality</td>
</tr>
<tr>
<td>03_info</td>
<td>Motor hall signal Abnormality</td>
</tr>
<tr>
<td>04_info</td>
<td>Torque sensor signal Abnormality</td>
</tr>
<tr>
<td>05_info</td>
<td>Axis speed sensor Abnormality(only applied to torque sensor)</td>
</tr>
<tr>
<td>06_info</td>
<td>Motor or controller has short circuit Abnormality</td>
</tr>
</tbody>
</table>

Electronic control system failure will display (flashing) fault code. Once the fault was removed, it automatically exits from the fault code display interface.

General Project Setting

1. Set maximum riding speed

After power on for 5 seconds, hold ▲ and ▼ button at the same time, maximum riding speed KM/H and MXS flash, hold ▲ or ▼ button shortly to set the maximum riding speed (default 25KM/H). Hold ▼ button shortly and go to the next parameter settings.

2. Wheel diameter setting

The wheel diameter will be set after finishing setting the maximum riding speed, wheel diameter specifications flashes. Hold ▲ or ▼ button shortly to set the specifications of wheel diameter. Select the range 6,8,10,12,14,16,18,20,22,24,26,700C,28 and 29 inches. Hold ▼ button shortly and go to the next parameter settings.

3. Set the metric or imperial units

The metric or imperial units will be set after finishing setting wheel diameter, KM/H and KM flash. Hold ▲ or ▼ button shortly and select metric or imperial units of speed and mileage in synchronization.

<table>
<thead>
<tr>
<th>Display</th>
<th>Metric</th>
<th>Imperial</th>
</tr>
</thead>
<tbody>
<tr>
<td>Riding speed</td>
<td>KM/H</td>
<td>MPH</td>
</tr>
<tr>
<td>Total distance</td>
<td>KM</td>
<td>Mil</td>
</tr>
</tbody>
</table>

4. KM/H and KM stop flash after metric unit setting is completed. Hold ▼ button shortly again to re-enter the maximum riding speed setting interface; or hold ▼ button long to exit from setting environment of routine projects and save the setting values, returning to display 1.

5. Exit from routine project setting

All three routine project settings can exit from the setting environment and return to the display if hold ▼ button long after each setting is completed, meanwhile the setting values are saved.

Under each setting interface, if the button failed holding for more than 1 minute, it will automatically return to display 1, and the setting value is invalid.
