

# Men's Ring Sizing Guide

To determine your ring size, print out this page without resizing. It needs to be at 100% or full scale for accuracy. To double-check the accuracy of your print-out, match the scale below using your ruler. Your ruler should match the 2 inches and the 20 millimeters, respectively.

## MEASURE USING AN EXISTING RING

1. Select a ring that fits the finger that you would like to wear your John Atencio ring.
2. Place the existing ring on top of the chart below and find the circle that most closely matches the interior dimension of your ring. The inner edge of your ring should align with the outer edge of the circle. (You might need to close one eye and make sure your alignment is correct.)
3. If you are between sizes, we suggest you select the larger size.

## MEASURE USING THE PAPER SIZER

1. Cut along the outside of the printable ring sizer (below). Cut a small slit on the dotted line just below the John Atencio logo, as shown
2. Wrap the sizer around the intended finger with the measurements facing out.
3. Move the sizer and pull to secure. It should fit snugly to get show as accurate size. The number that lines up with the slit is your ring size.

**Sizing + Timing:** All John Atencio rings are Comfort fit. You may need to adjust your size down slightly vs the standard measurement to attain a perfect fit. We encourage you to order our complimentary sizing kit to confirm your size.

While our Men's stock size is 10, we offer an incredible range of innovative metals, materials, and gemstones and generally custom create your ring for your exact look and lifestyle. Please allow 4-6 weeks for a custom ring design. Sizing of an in-stock ring up or down 1 ½ sizes generally requires 2 weeks.

Please note that this ring guide is for reference only. We suggest you stop by a John Atencio Boutique to be sized by one of our consultants. Find a John Atencio location [here](#).
