

# BAIT-RITE PASTE

## Effective Control of Feral Pig and Possums

### Product Forms

2.5kg, 5.0kg and 10.0kg pails

### Product Features

- Bait-Rite is an effective humane tool for control of feral pigs and possums.
- Biodegradable, no persistent residues, minimal risk of secondary poisoning and antidote available.
- Successfully trialled in New Zealand and Australia.
- The active ingredient, encapsulated sodium nitrite in a paste bait is very palatable to feral pigs and possums.
- Optimum results achieved by prefeeding with non-toxic paste.
- Must be used in bait stations. Available from Connovation or plans supplied.
- No licence required for purchase and use.
- Environment Protection Authority permission sheet must be completed before feral pig control operations can commence. ([www.epa.govt.nz](http://www.epa.govt.nz))
