

LASH V™ LASH LIFT PROCEDURE

IMPORTANT INFORMATION:

- Gently massage sachets prior to opening and dispense into a glue ring.
- Per sachet, you can usually treat between 3-4 customers
- Once open, use within 24 hours (or 7 days for patch testing) if sealed immediately with micropore tape and stored in an air tight container after every use.
- Please perform a patch test before treatment.
- **Please refrain from use of water and cling wrap.**

PROCEDURE

- The treatment time varies depending on the individual client's lashes.
- Complete client's consultation sheet.
- Position client comfortably.
- Take a before photograph if required.
- Protect client's hair with headband and drape a towel over your clients upper body to protect clothing.
- Sanitise your hands.
- Remove any traces of make up with an oil free make up remover and a clean cotton pad, place cotton pad in bin.
- Comb through the lashes using a disposable mascara wand, put the mascara wand to the side for later in the treatment.
- Place a collagen pad under each eye ensuring client's bottom lashes are secured under them.
- Choose the appropriate shields, trimming to fit as required.
- Apply adhesive to the back of the shield and place in position on the eyelid close to the root, hold in place for 20 seconds.
- Apply adhesive to the shield in small sections and lift the lashes from the root using the lash tool and attach them to the shield. Gradually move along the shield until all lashes are bonded to the shields.
- **Please refrain from use of water and cling wrap.**

STEP 1

Apply a small amount of lash lifting cream from root to 1/3 up the lash for a lift and maximum ½ way up lash for lift and slight curl using a micro-applicator.

PROCESSING TIME:

- **Very fine to fine : 4-5 minutes.**
- **Tinted or Natural Healthy: 5-6 minutes.**
- **Natural healthy lashes: 6-8 minutes.**

Remove using a clean micro-applicator and rolling technique ensuring solution does not touch the tips.

STEP 2

Apply a small amount of Neutralising Lotion to where the lash lifting cream was applied using a micro-applicator.

PROCESSING TIME:

- **Very fine, fine and tinted lashes: 5 minutes.**
- **Natural healthy and course healthy lashes: 6 minutes.**

Remove using a clean micro-applicator, place used micro-applicator in the bin.

OPTIONAL COLOUR BOOST:

- Prepare chosen colour of tint and apply using a tint brush. Remove tint after 3-5 minutes using a clean cotton bud, and then place used cotton bud in the bin.

STEP 3

- Apply Moisturising Serum over the lashes using a micro-applicator, then gently releasing the lashes from the shield.
- Apply Moisturising Serum to the eyelid under the lash shield using a micro-applicator, then gently releasing the shield from the eye.
- Use a clean cotton bud to remove excess serum from the eyelid, and finally place the cotton bud in the bin.
- Customer can leave Moisturising Serum on for the next 24- 48 hours and avoid water and make up.
- Lash V lash growth serum is perfect to prevent dryness of hairs, premature fall out and keeps lashes healthy.
- Take an after photograph if required.
- Explain aftercare to your client and give them a printed copy to take away along with a mascara wand.

LASH-V™ **BROW LAMINATION PROCEDURE**

IMPORTANT INFORMATION:

- Gently massage sachets prior to opening and dispense into glue ring.
- Per sachet, you can usually treat between 3-4 customers.
- Once open, use within 24 hours (or 7 days for patch testing) if sealed immediately with micropore tape and stored in an air tight container after every use.
- Please perform a patch test before treatment.
- **Please refrain from use of water and cling wrap.**

PROCEDURE

- The treatment time varies depending on the individual client's brow density.
- Complete client's consultation sheet.
- Position client comfortably.
- Sanitise your hands.
- Take a before photograph.
- Remove any traces of make up using an oil free make up remover and a clean cotton pad, then place in the bin when completed.
- Comb through brows using a Y-Tool applicator or disposable mascara wand. Put the mascara wand to the side for later in the treatment.
- Apply thin coat of adhesive slowly and carefully. Straightening brow hairs to desired direction to add shape and definition.

BROW TINT CAUTION:

When applying a brow tint application, be mindful the brow tint process time is a lot faster as it develops a lot quicker (up to half the time).

STEP 1

- Using a micro-applicator, apply a thin coat of Step 1 to the brow hair. Apply from the root to $\frac{3}{4}$ the way up the hair. This ensures hair will be set in the right direction, will soften thick hair, and also straighten curly strands.
- **AVOID the tips at all times.**
- **Please refrain from use of water and cling wrap.**

PROCESSING TIME:

- **Fine or tinted brows: 4-5 minutes.**
- **Natural healthy brows: 5-6 minutes**
- **Course healthy brows: 6-7 minutes.**

Remove using a clean cotton bud, place used cotton bud in the bin.

STEP 2

Apply a small amount of Step 2 Neutralising Lotion to where the Step 1 was applied using a micro-applicator.

PROCESSING TIME:

- **Very fine, fine and tinted brows: 5 minutes**
- **Natural healthy and course healthy brows: 6 minutes.**

Remove using a clean cotton bud, then place the cotton bud in the bin.

Comb brow carefully with a brow brush, following its shape and hair growth.

STEP 3

- Apply Moisturising Serum over the brows using a mascara wand and style accordingly.
- Customer can leave Moisturising Serum on for 24-48 hours and avoid using water and makeup.
- Lash V brow growth serum is perfect to prevent dryness of hairs, premature fallout and keeps brows healthy.
- Take an after photograph if required.
- Explain aftercare to client and give them a printed copy to take away along with a mascara wand.
