Bullitt Advanced Lightbar

BULLITT

The Bullitt Advanced lightbar is designed beautifully to allow maximum configurability with its easy daisy chain plug and play system with an intelligent control board at the heart that provides almost an unlimited amount of functionality to be programmed by the user without the need of a computer, by utilising series of wires or our optional purchased programming kit for easier programming that opens up the many possibilities desired through the 9 available inputs on top of 4 pre-set functions already available. The Bullitt Advanced is R65 Class II approved (amber and blue) and R65 Monitor output. Whilst maintaining all the desired functions needed such as Work/Take-down/Alley Lights the Bullitt Advanced also comes with an in-built traffic director available on either front, rear or both sides of the lightbar selectable through programming the lightbar manually is outlined, to top even more feature show off, the traffic director length can be selected through its programming functionality. The Bullitt Advanced comes with the unique function 'Flexi-Flash', which allows the user to set a single LED module (or multiple modules) programmed to this input function, in any desired format, giving the user total flexibility. Here are Redtronic we are extremely confident and proud at the performance, design and quality of the Bullitt Advanced that we have endorsed it with a 5 Year Warranty.

Features and Benefits

R65 CLASS II | R65 CLASS II | R10 EMC | ICAO CAP168 | IP69K

- Wide-angle FX Optic with Ultra-bright latest generation LED's
- 4mm ultra-strong UV stabilised polycarbonate lens
- Single, tri and multi colour options:
- Module options: alley lights, rear reds, worklamps, flood lamps, stop tail turn, indicators and takedowns
- Features: rotating flash pattern, 360° white light, traffic director, flexi-flash, 9 programmable inputs, R65 monitor output, aerodynamic drag 1.45mp
