

## BAGNETIQUE INSTRUCTIONS

### INSTALL IN YOUR BAG: STICK-ON METHOD

The glue won't leave residue or harm your bag! You can remove Bagnetique anytime by just pulling it off your bag. **Stick on method is recommended especially for deep and floppy bags**, or if you want your stuff to be exactly where your hand reaches in your bag.

1. Remove the clip from inside the Bagnetique, and re-insert BOTH ends of the clip into the slot (just to the bump), making a lever to remove your phone easily without stressing the glue.
2. Peel off the paper and **PRESS FIRMLY** into the position you want in your bag.
3. **WAIT AT LEAST 3 HOURS for the glue to properly bond with your bag!**

### INSTALL IN YOUR BAG: CLIP-ON METHOD

Hang Bagnetique on an inside pocket of your bag using the clip. (do not remove the paper backing!). To remove your phone one-handed, just slip your fingers behind your phone and push back against the clip with one and forward against the phone with another.

### MAKE YOUR STUFF MAGNETIC: ATTACH METAL PLATES OR DISCS

Peel off the paper on the included metal plate or disc and **PRESS FIRMLY** to the back of your phone or phone cover (or whatever you want to hang on your Bagnetique). Wait a few minutes for the glue to activate. You can also just slide the plate inside or behind your cover, but if the cover is thick it will reduce the magnetic attraction.

## INSTALL IN CAR, KITCHEN, HOME, OFFICE

To use in home, car, office, workshop:

Remove the clip and use the glue backing to stick on any smooth surface, for easy access to phone, keys, other, anywhere! Just peel off the backing paper, and press firmly into the place you want your Bagnetique. Once placed, allow 15-30 minutes for the glue to activate fully.

## REPLACING THE GLUE

When the glue gives up (it won't last forever!), you can replace the glue pad

1. Peel the existing glue pad off the back of your bagnetique
2. peel the paper off one side of the replacement glue sticker
3. place carefully on the back of the bagnetique and press firmly

now you can install it again with the new glue!

## REGENERATING THE GLUE

When moving to a new spot in the house, car, etc, you need to regenerate the glue.

To regenerate the glue, run under very hot water for about 30 seconds. Pat dry.

When installing in a new position, press firmly, and leave at least 15-30 minutes for the regenerated glue to activate.

**NB: Regenerated glue should NOT be reinstalled in your bag...it won't work well, and it could leave residue.**

## ADVISORY/WARNINGS

- 1) Chip credit cards are not affected by magnets. Older Credit/Debit cards with data strips could be affected if they are in direct contact with the magnet for an extended period of time. **Keep them in a wallet** and they will be perfectly safe!
- 2) **The packaging is 100% biodegradable, but the magnet is not – please dispose of it responsibly!**
