

Vick Audio

Handcrafted Guitar Effects

Model: V-2

USER MAUAL
&
INSTRUCTIONS

Specs

DIMENSIONS: 92.7mm x 119mm x 48.6mm (3.7" x 4.67" x 1.92")with knobs

WEIGHT: 293g (.65 lbs.)

BYPASS: True Bypass

POWER REQUIREMENTS: 9V DC Center Negative

CURRENT DRAW: 12.5 mA

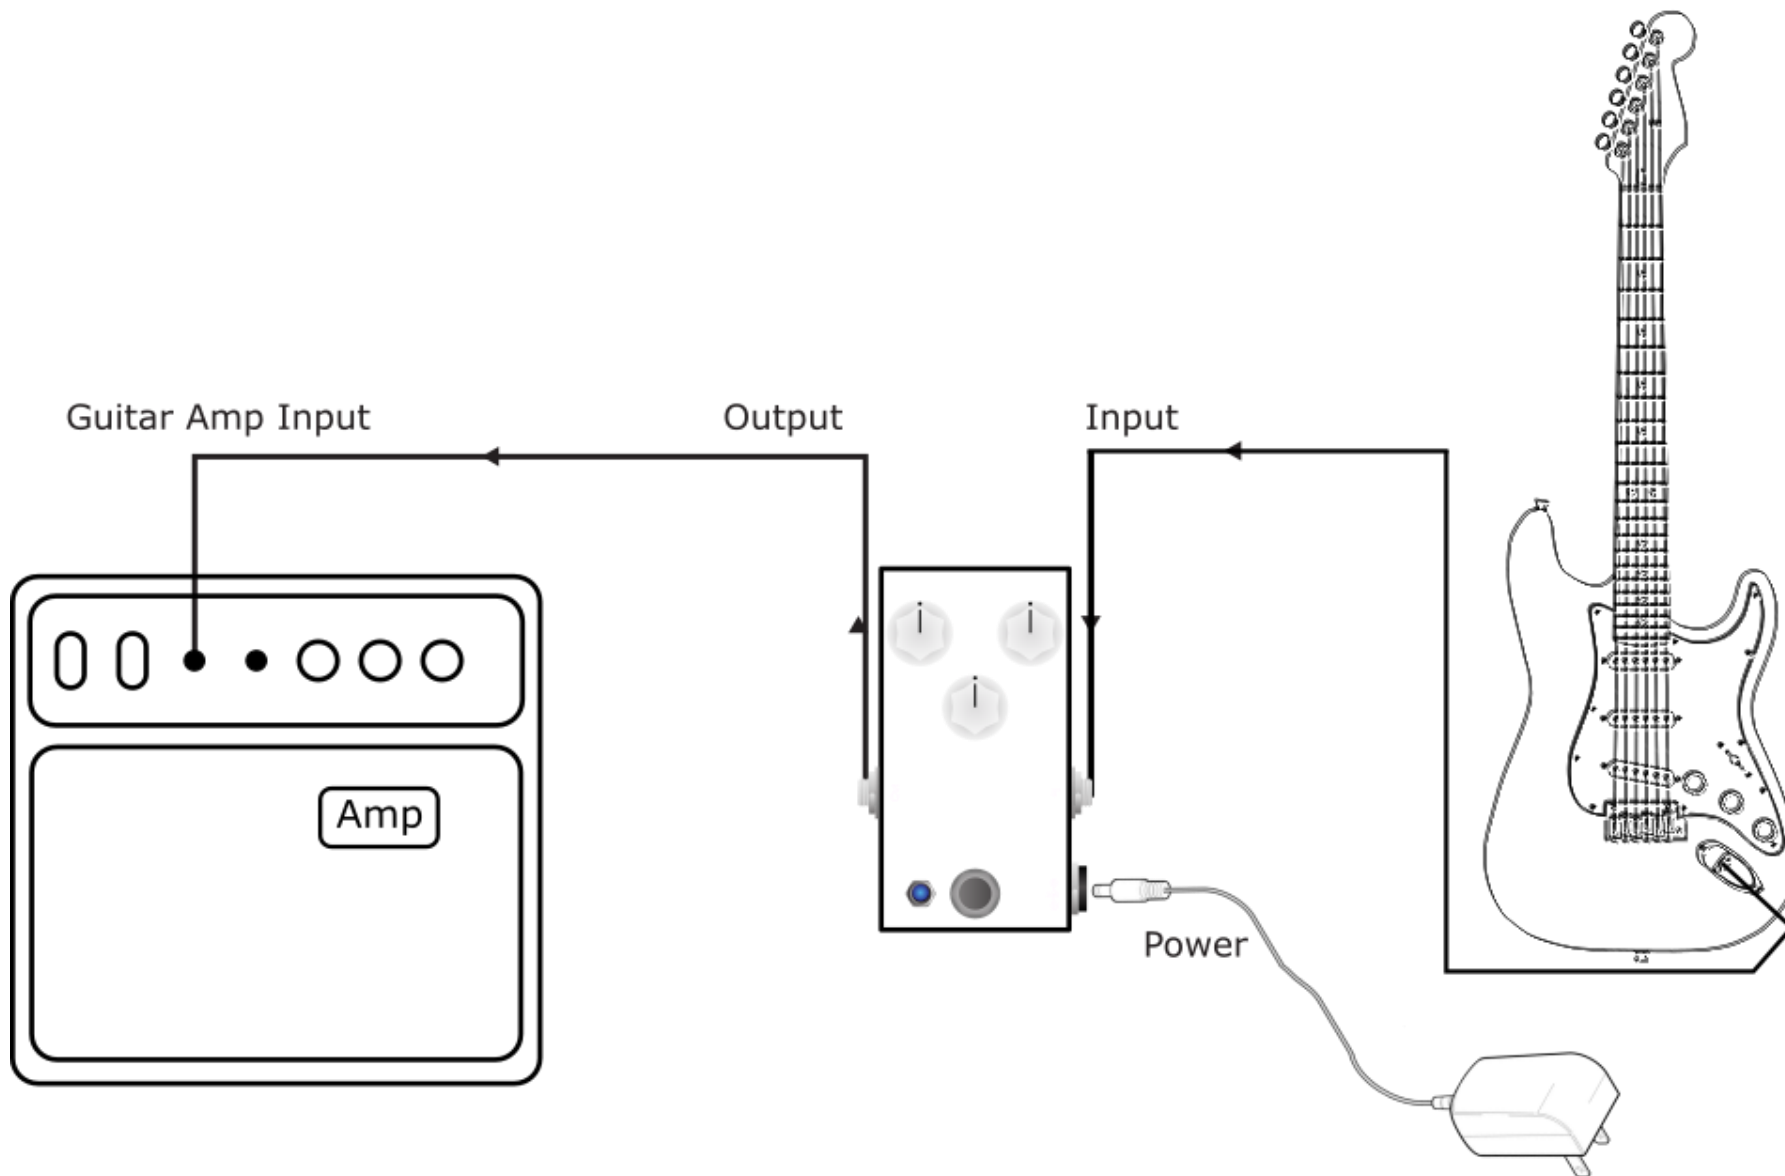

Power Supply

Vick Audio pedals can be powered by a 9V DC negative tip power supply with a standard Boss style 2.1mm connector (not included)

Current supply should be a minimum on 25 mA to include a safety margin for the DC power adapter.

Please make sure to use a good quality power supply designed to be used with guitar pedals. Generic power adapters can induce a large amount of unwanted noise to the audio signal. Boss and 1Spot both make excellent adapters.
