WOCA MASTER SOAP INSTRUCTIONS

Master Soap is for frequent and daily cleaning of floors and does not leave a film or residue. It is ideal for commercial floors, such as restaurants or retail spaces, where constant cleaning is necessary.

An oiled wood floor that is regularly cleaned with Master Soap, should also be maintained with WOCA Oil Refresher or Maintenance Oil/Maintenance Gel on a periodic basis to keep the surface durable.

WOCA Master Soap may be used for the cleaning of all wood surfaces, tile, vinyl and stone. WOCA Master Soap can be applied manually or with a floor machine.

Follow these simple steps:

1. Mix 1 cup of Soap into 1 gallon of lukewarm water.
2. Damp mop the floor with a well wrung, high quality cotton yarn mop.

Packaging: 5 Liter Container
