WOCA NATURAL SOAP MAINTENANCE INSTRUCTIONS **For all oil finished floors**

WOCA Natural Soap is designed to clean and protect oil finished surfaces from dirt, stains and wear and tear. WOCA Natural Soap cleans and leaves behind an invisible layer of soy and coconut fats, which greatly help to ward off most anything. In fact, when used on a regular basis, WOCA Natural Soap increasingly makes your oil finished wood floor more dirt and wear resistant and easier to keep clean.

We recommend that all oil finished floors be washed with WOCA Natural Soap one week after oil application for maximum protection and durability as described above. Follow these simple steps:

1. Daily cleaning is done with vacuum cleaner or by sweeping. The frequency of floor cleaning depends on the wear on the floor.
2. Natural Soap is shaken carefully before use.
3. Mix 3 ounces of Soap into each gallon of lukewarm water.
4. Damp mop the floor with Natural Soap solution.
