WOCA OIL REFRESHER INSTRUCTIONS For all oil finished floors

WOCA Oil Refresher, available in Natural and White, is used for periodic cleaning and maintenance of oiled wood floors. Oil Refresher combines efficient cleaning with oil rejuvenation, as additional oil penetrates the wood and forms a protective layer in the surface.

Work Instructions:

1. Shake the bottle well before and during use.
2. Mix Oil Refresher with lukewarm water:
 - For traditionally oiled floors: 1:20 (6 oz/gallon of water).
 - For UV-oiled and waxed floors: 1:40 (3 oz/gallon of water).Mixing ratios can vary depending on wear and requirement.
3. Damp mop the floor.
4. Leave the floor to dry for approx. two hours before use.
5. For slightly higher sheen, polish the dry floor with a white pad.

Tip: If a haze is visible after the Oil Refresher treatment, put a damp cotton cloth under a floor machine and polish it off, or damp mop the floor with plain water.

Packaging: 1 & 2.5 liter containers
