WOCA INTENSIVE WOOD CLEANER INSTRUCTIONS

WOCA Intensive Wood Cleaner is used for deep cleaning of treated and raw wood surfaces. It is an important step in oiling and re-oiling. Intensive Wood Cleaner pops the grain and neutralizes tannins in wood, which helps to prevent water spotting.

Work instructions:

A. Unfinished wood floors and woodwork

1. Mix 3 ounces of Wood Cleaner into each gallon of lukewarm water. Damp mop floor thoroughly with Wood Cleaner solution.
2. Repeat cleaning if extremely dirty.
3. Let dry completely before oiling.

B. Oiled floors and woodwork

4. Mix 3 ounces of Wood Cleaner into each gallon of lukewarm water. Mop floor thoroughly with Wood Cleaner solution.
1. Repeat if floor is extremely dirty. Let dry completely.
2. Re-oil floor or woodwork with WOCA Diamond Oil Active Maintenance Oil or WOCA Maintenance Gel.
