## Air Cooler Instuction Manual

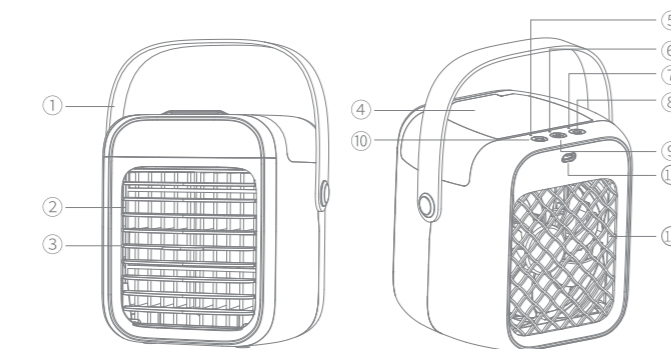

make it *easy*.

### Specification

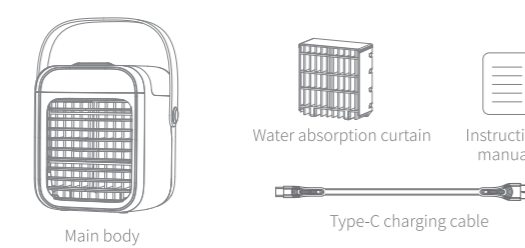

Model	WT-F26
Material	ABS+Silica Gel+Leather
Input	5V ---
Water Tank Capacity	300mL
Motor Speed	1500rpm-2500rpm
Working Current	0.2A-1.6A
Product Size	173*152*173mm
Weight	873g
Working Wattage	1W-8W
Battery Capacity	2600mAh/18650

### Product Structure

- ① Handle
- ② Tank lid
- ③ Fan indicator
- ④ LED light switch
- ⑤ Air outlet
- ⑥ Charging indicator
- ⑦ Fan button
- ⑧ Type-C
- ⑨ Adjustable fan blade
- ⑩ Spray indicator
- ⑪ Spray key
- ⑫ Air inlet

### Package Content

### Indicator Status Description

Indicator status	Charging indicator	Fan indicator	Spray indicator
The red light is always on	Charging	First speed	---
The blue light is always on	Full charge	Second speed	---
The green light is always on	---	Third speed	---
The white light is always on	---	---	Turn on the spray
The red light fast scintillation	The battery is low	---	---
Light off	Not charging/Run out of battery	Not working	Turn off the spray

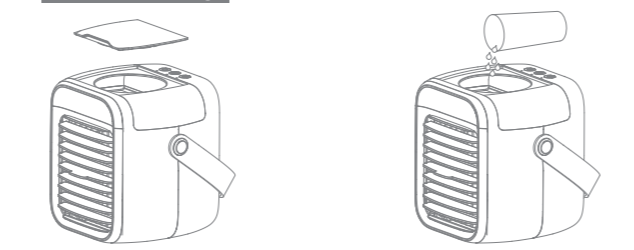

### How to start the fan/Humidification function

- ① The fan can be powered by using a Type-C charging cable to connect the fan with the charging adapter or the computer's USB port.
- ② Short press the fan button, the fan and spray will start at the same time. (The first speed will be activated by default.) Short press the fan button again to adjust the fan speed, press the button to increase the wind speed step by step. After reach the third speed, press the fan button again to turn off the fan and spray functions at the same time.
- ③ When the fan function turned on, short press the spray key can turn off the spray function separately. When the sensor board detects that there is insufficient water in the water tank, the spray function will also be automatically turned off
- ④ Short press the LED light switch, the colorful light starts to cycle, long press the light button to fix the color, and short press again to extinguish the light.

**Tip: wet the water curtain when using, better cooling effect!**
