

How to fit your Henchman Rubber Feet

Step 1

Place any two of the claws (shown as No1 and 2) on the ladder foot into the slot between the rubber skirt and the centre of the rubber foot

Step 2

Holding the leg still twist the rubber foot to ensure claws 1 and 2 are fully inserted into the rubber foot

Step 3

Feed the remaining two claws, 3 and 4 using your finger (we used a screwdriver to ease the skirt of the foot over the claws) then twist the rubber foot to seat it fully home
