

STRIPPING

When is it useful?
When the diapers smell like stools, baby is having skin irritation,
or you're experiencing regular leaks.

You will need to use **Oxyclean**.

DIRECTIONS FOR USE (must be done on clean diapers)

1 Fill your washing machine or bath tub with hot water (60°C) and add ¼ cup Oxyclean (or 62.5 ml) for a medium load.

2 Stir well and let it soak overnight (or at least 4 hours).

3 Empty the tank and rinse with warm water.

4 Do a regular wash with a spinning cycle at the end.

5 Repeat the previous step until you no longer see foam.
