Transform your surroundings and elevate your living spaces with the exquisite beauty and versatility embodied in our curated selection of metal finishes.

Wax - Our wax coating allows the natural aging process to happen gradually overtime with use and natural oxidisation. If you wish to prolong the aging process regularly apply wax when cleaning to slow the aging process.

Lacquer - Lacquer protective coating preserves and prevents the natural aging process. Lacquer is a great option if you do not wish for the finish to change overtime or wish to reduce finger prints.
