

ACCURACY FOR PEACE OF MIND

Nonin Model 7500FO (Fiber Optic) Pulse Oximeter

Easy to use

Lightweight

Durable

Versatile

Rest Easy. Act Confidently.

The Nonin Model 7500FO Pulse Oximeter empowers clinicians with accurate oximetry information¹— helping them act quickly and confidently in the moments that matter.

The 7500FO is specifically designed for MR environments. Due to the 7500FO's fiberoptic sensor and cable design, radio frequency burns and image artifacts are eliminated.

Lightweight, compact, and portable, the 7500FO is ideal for monitoring infant, pediatric, and adult patients in fixed-site or mobile MR facilities.

A Monitor for What Matters

Pulse Strength Bar Graph

Assess the patient's status at a glance with a color-coded bar graph and a saturation level-related audible tone at each pulse.

Pulse Quality Indicator

Detects patient movement or signal quality changes that may require sensor site stabilization.

Sensor Fault Indicator

Indicates when a sensor has become disconnected, misaligned, failed, or is incompatible with the monitor.

Accuracy you can act on

PureSAT® Technology – Intelligent pulse-by-pulse filtering provides accurate oximetry measurements.²

Convenient – Lightweight with large, bright, LED display offers clear readability.

Powerful Internal Memory – 70 hours of memory available for extended use.

Flexible – Can be used in fixed-site or mobile MR facilities as a stand-alone device or interface with other equipment to monitor infant, pediatric, and adult patients.
