Real CPR Help

Failure to adequately compress a victim's chest is a common error during CPR.^{1,2,3} Real CPR Help converts compression data instantaneously, and provides visual and audio prompts to help the rescuer with the proper rate and depth. Activated audio prompts say, "Push Harder" or "Good Compressions."

See-Thru CPR

See-Thru CPR^{4,5} is an advanced feature on ZOLL's R Series[®], E Series[®], and AED Pro[®]. Artifact caused by CPR compressions is minimized giving clinicians the ability to see organized electrical activity during compressions without interruptions.

CPR Index

The CPR Index⁶ is a feature on ZOLL's R Series and E Series. It is an intuitive visual summary of chest compression efforts that takes into account rate, depth and gaps between CPR cycles.

CPR-D•padz

The **CPR-D•padz** was designed for ZOLL AEDs. The unique one-piece design uses a CPR landmark for hand placement, and makes it easy to place the **CPR-D•padz** on the victim quickly. The **CPR-D•padz** also lasts five years – the longest life of any electrodes sold today.

CPR stat•padz

CPR stat•padz is designed for use with ZOLL manual defibrillators. The two piece construction ensures all therapy options are available to the ALS responder. The unique design gives it utility in both the Anterior/Anterior and Anterior/Posterior placement.
