

Join us in changing lives, one cashew at a time - cultivating thriving communities and a brighter future for Mozambique

Uplifting Mozambique one community at a time!

Scan the QR Code on our packaging and see how the farming communities of Mozambique benefit when you buy this bag of cashews.

Our aim is to alleviate poverty by creating sustainable income-generating activities and supporting smallholder farmers. We use business profits to fund community-building social impact projects including improved access to education, healthcare, nutrition while encouraging community building and environmentally-friendly farming

The urgent challenge - Mozambique

Mozambique ranks among the world's poorest countries, with a significant portion of its population living below the poverty line. The country has also witnessed a humanitarian crisis, with ongoing conflict, particularly in regions like Cabo Delgado. This conflict has led to the displacement of over a million people, creating a dire need for assistance and a pathway towards peace.

Our solution: A sustainable approach through ethical global business funding social impact work

At the heart of what we do is a cashew nut growing and processing business, based in Mozambique which creates local employment while also funding social impact projects out of profits. Through the sales of premium cashew nut products, Sunshine Nut Co. donates 90% of distributed

"Our aim is to foster sustainable economic transformation in Mozambique by equipping individuals with education, skills and facilities, empowering them to become successful entrepreneurs."

profits (after covering debts, expenses, and future investments) to the Sunshine Approach Foundation, which then channels these funds to transform communities. For more detail, click here or scan the QR code above.

Did You Know?
 Over 50% of the world's cashew crop is grown in Africa but over 90% of those cashews are processed in other countries.

We're changing that one cashew at a time.

At The Sunshine Nut Company, we grow, roast, and package right at the source for premium freshness.

Life tends to have nutty twists!

The net result is that you can offer your customers cashew nuts which are:

Healthy - Cashews are rich in unsaturated fats, which are linked to lower risk of heart disease, low in sugar, a source of fibre and almost the same amount of protein as an equivalent quantity of cooked meat. They also contain a whole range of minerals essential for energy production, healthy brain development, and a strong immune system. They are the primary source of anarcadic acid, which can kill the bacteria that causes tooth decay, acne, tuberculosis and Streptococcus pneumonia (MRSA)

A customer commented *"These cashews are not only of excellent quality from a company with an amazing ethos but also the only ones I have found which are free from cross-contamination with other nuts like peanuts, which is relevant for someone with an allergy to peanuts. They are also so tasty!"*

Tasty - A super fresh and crunchy product, because the supply chain from farm to shop is short. They are roasted and packed locally within weeks of being picked. Most cashews have much longer journeys from farm to processing factories in other countries and continents, and then back to markets in the west. They are also available in 4 great flavours (Herby, Spicy, Salty & Plain) and 2 retail pack sizes (30g and 200g) and also in a bulk 4.5kg Salty pack for catering.

Ethical – For all the reasons above, by buying Sunshine Nut cashews in the UK from African Kingdom, you are helping to create jobs with dignity while supporting communities in one of the poorest and most troubled countries, Mozambique.
