

VOLUME 22 Digital V2

# **NEW EDITION COMING SOON**

Refer to the website for the latest product range

Our reputation is built on manufacturing classic & contemporary bathroomware for New Zealand homes using quality materials that are made to last.

# Design. Innovation. Inspiration.

The purpose of bathroomware is evident. By refining functional elements we allow you to take it further - to transform a practical component into a striking feature within your home.

Athena has been a trusted bathroomware manufacturer and supplier to the New Zealand building & plumbing industry since 1982.

Locally owned & operated for 40 years, Athena Bathrooms reputation is built on designing and manufacturing classic, contemporary and luxury bathroomware for New Zealand homes – using quality materials made to last.

We work with a multitude of Group Home Builders, Specifiers and Architects and our products are available at all leading Plumbing & Building Merchants nationwide.

Our key objective is to provide superior solutions to the trade industry and home owners that not only meet broad design requirements but are also safe and of the highest quality. Manufacturing trusted products using quality materials is crucial to ensure our products are made to last.

Overall it's about being a responsible manufacturer with an understanding of our customer – the New Zealand consumer.

Athena has been a trusted manufacturer and supplier to the New Zealand building industry

since 1982.

# WHERE TO VIEW Auckland Showroom

54-58 Hillside Rd, Glenfield, Auckland 0627

**OPENING HOURS:** 

Monday - Friday 8.00am - 5.00pm Saturday 9.00am - 12.00pm Closed Sundays & Public Holidays Closed long weekend Saturdays

09 443 9551 info@athena.co.nz athena.co.nz

#### WHERE TO PURCHASE

Available to purchase through all leading plumbing and building merchants nationwide. Select locations will have a range of Athena products on display. Visit athena.co.nz to find your local retailer.

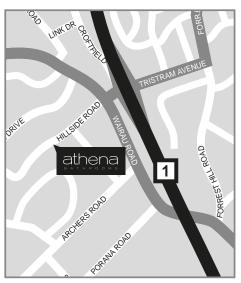

#### WARRANTIES

At Athena we pride ourselves on the quality of our products. To give you confidence that your Athena product will stand the test of time, we offer warranties on all our product ranges. Installation expertise is key to gaining the best from our products.

To ensure you are confident that your selected bathroomware has been installed to the highest standard - and to manufacturers' specifications, - we recommend you obtain a written guarantee from your installer

Warranty applies to residential domestic use only.

# SHOWER Information

Since 1982 Athena has been creating showers for New Zealand homes.

We design and develop products specifically for New Zealand homes using the knowledge and experience of our NZ based product development team.

The aim is to evolve with ever changing design trends, while ensuring that functional features and the use of quality raw materials remain a key focus. Athena showers carry a 5 year manufacturer's warranty.

#### DOOR SET

Shower door and returns use toughened safety glass which is manufactured to NZS4223 Part 3: 2016, AS/NZS 2208

Athena showers have been designed to Peature minimal joinery on the doors and returns. Frameless and semi frameless glass does not close in the shower, in fact it gives a greater perception of size, space and depth in the bathroom. It is also more difficult for mould and grime to build up on, and is therefore easier to keep clean.

> Installation tolerances are built into the door and return systems to compensate for out-of plumb walls.

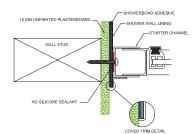

#### ACRYLIC WALL

- > Wall linings are made using premium quality Senosan®acrylic capped ABS which provides a glossy, easy clean surface.
- > Moulded walls are a convenient way to incorporate storage into your shower. The moulding is seamlessly integrated with no joins making cleaning easy and minimising mould or mildew build up.
- > Lifestyle and Soul showers feature a finishing profile to cover the edge of the acrylic wall.

#### SHOWER TRAY

- > Shower trays are made using Pibreglass reinforced construction for superior strength and come complete with a chrome Easy Clean waste
- > Soul shower trays use senosan® antibac® acrylic capped ABS. The waste is positioned in the back corner to enable comfortable showering without standing on or around a traditional centre waste. The waste can be positioned in the back corner or in the centre. Wall studs do not need to be checked out with our trays. The tray upstand height means no silicone is seen inside the shower.
- > Lifestyle and Motio shower trays are made using spremium Senosan®acrylic with an aluminium upstand profile bonded and fastened to the sides of the tray. This profile allows the tray to be placed directly against the studs without the need for any check in, meaning standard thickness GIB Aqualine® board or 9mm Villa board can be used to line the walls. The upstand creates a 40mm vertical surface to bond any water proofing membranes, ensuring a leak proof wall to tray junction.

#### SHOWER INSTALLATION

Installation expertise is key to gaining the best from our products. We recommend that an Athena trained installer is used for installation of our showers. If installations are not completed as specified in our instructions the manufacturers warranty is void. A full list of installers is available on our website athena.co.nz

#### CLEANING & MAINTENANCE

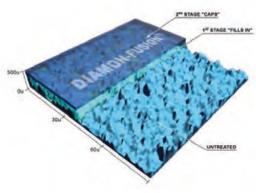

- > Wipe down the shower or use a squeegee to remove excess water from the glass after use. If choosing Diamond Fusion option follow their instructions for cleaning the glass.
- > Use a trusted glass cleaner on shower glass
- > Use Vibrance Surface Cleaner to clean the tray and acrylic walls refer page 47
- > Waste lid and cup should be removed and cleaned regularly
- > Remove and clean drip seals on a regular basis, these can simply be replaced when they no longer look their best

<sup>\*</sup>Motio Black Finish Upgrade Shower Kit available (refer page 6)

Diamond Fusion easyCLEAN treatment is available on Lifestyle and Soul Showers and bath swing panels. Motio Showers cannot be factory treated.

For a post-installation quote contact Diamond Fusion on 0800 667 278 or visit diamond Pusion.co.nz.

Put simply, Diamond Fusion is a permanent treatment designed to seal and protect glass. Treated surfaces become water repellent as well as scratch, stain and impact resistant. Diamond Fusion easyCLEAN uses the world's leading Nano Technology products from "Diamond-Fusion International". Nanoscale technologies are the development and use of devices that have a size of only a few nanometres.

#### HOW DOES IT WORK?

Glass is not as smooth as you might think – it is actually quite a porous surface which makes an ideal setting for soap residue, dirt and mineral build ups to reside which, over time can result in a cloudy or noticeably dull appearance.

Diamond Fusion Easy Clean works in two stages to protect your glass from these impurities. The first stage "Fills in" the rough, porous surface of the glass and the second stage "Caps" the previous layer with an optically clear material which makes the surface significantly easier to clean and resistant to weathering.

#### SAVE TIME NOW AND LATER

NOW - By opting for this optional treatment to be applied to your shower glass before it leaves the factory\*, there's no need to worry about arranging the application once your shower has been installed.

LATER - While you still need to maintain your glass, Diamond Fusion easyCLEAN takes the difficulty out of it. Your Saturday mornings will no longer be spent scrubbing your shower glass for hours.

 $^*$ Factory applied treatment is available for all showers except Motio. If you would like your Motio treated please contact Diamond Fusion.

#### LIFETIME WARRANTY

Diamond Fusion easyCLEAN offers an instant 1 year warranty. By a simple on-line registration customers can extend this to a LIFETIME WARRANTY, which is backed by a NZ wide agent network.

The sticker placed on the glass door of your shower is there as a reminder and must only be removed once the registration has been completed.

Go to www.diamondfusion.co.nz, on the top navigation bar click on register, choose your shower brand and complete the form.

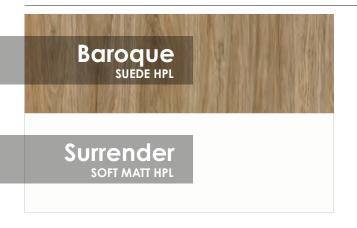

40 YEARS OF BATHROOMS

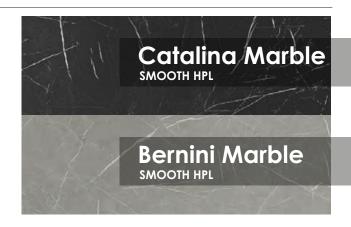

Celebrating
40 YEARS OF BATHROOMS
with New Products
in Nature Inspired Finishes

### SWIFT CABINET FINISHES

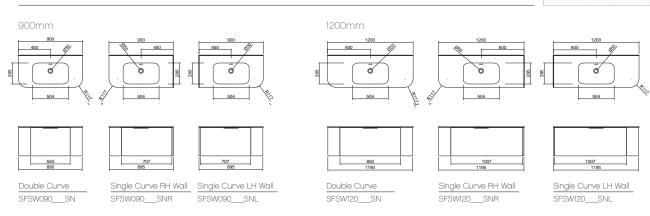

## SWIFT HANDLE FINISHES

Cabinets come standard with Brushed Nickel handles

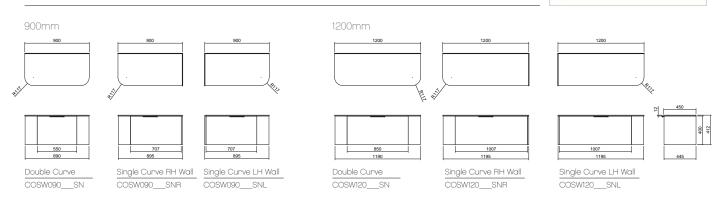

### SERIFOS SWIFT SOLID SURFACE TOP

The solid surface finishes flush with the flat end on both left and right hand cabinets.

Serifos Swift drawer has a waste cutout and comes with a 32mm SpaceMate® waste trap and chrome pop up waste.

# CONTOUR SWIFT SOLID SURFACE BENCH TOP

The solid surface finishes flush with the flat end on both left and right hand cabinets. Contour Swift has a full depth drawer and comes with a 32mm SpaceMate® waste trap.

Contour Swift 900 RH Wall Vanity in Baroque with VC Round Basin in Black and Soji Black 690 Round Mirro

# SWIFT Curved Vanity

#### 900 | 1200mm SERIFOS SOLID SURFACE TOP 900 | 1200mm CONTOUR SOLID SURFACE BENCH TOP

#### **CURVE APPEAL**

Mid-century or modern, curves add instant personality and contrast to any interior room. Vertical woodgrain, stunning marble and warm white Pinishes draw your attention to SwiPt's sweeping curves in the bathroom. The high pressure laminate (HPL) surface provides a durable, hard wearing and long lasting Pinish.

#### CORNER POSITION

With soft edges to move around, the left or right hand single curve cabinets are a unique solution where space is limited. For a bold statement in a larger ensuite or family bathroom, choose drama with the Swift double curve vanity.

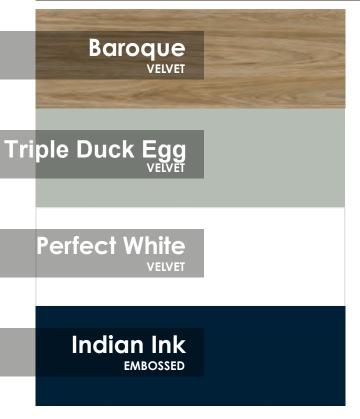

#### SLEEK SURFACE

Contour Bench Top is a warm toned white solid surface designed to take a top mount basin for a modern look. Serifos Solid Surface Top is a sleek, under-mount design that provides a classic, clutter free and easy clean solution. Both tops are made from composite material that is impact, stain and temperature resistant.

#### FINISHING TOUCH

A single, soft-close drawer provides ample storage for everyday needs. The subtly curved edge pull handle is available in finishes to compliment your tapware. Brushed Nickel is supplied or upgrade to Brushed Anthracite, Matt Black, Brushed Copper, Satin Brass and Matt White.

### FLEET CABINET FINISHES

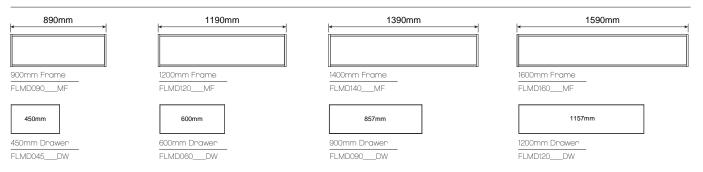

### FLEET HANDLE FINISHES

### FLEET FRAME AND DRAWER

# FLEET Modular Vanity

#### 900 | 1200 | 1400 | 1600mm

#### NATURE INSPIRED

Choose your Fleet frame + drawers and mix or match from the range of eight Nature Inspired colour finishes, selected to reflect New Zealand design and our homes. Customise with handles, basins and a bench top to complete the look.

#### REFLECT YOUR STYLE

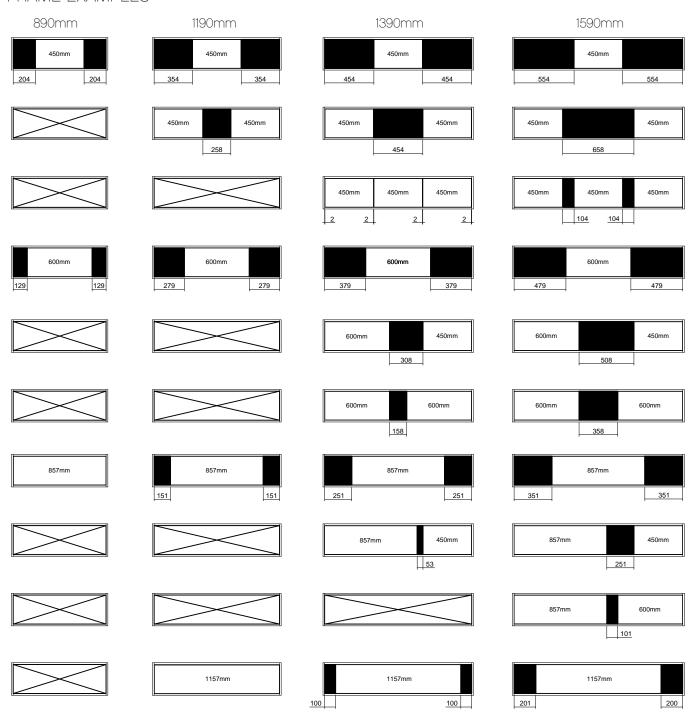

Start with the Fleet frame and add drawers, positioning anywhere within the outer cabinet before fixing into place. This allows you to install a basin above either the drawer or open space, creating a symmetrical or off-centre vanity design. Create a complete bathroom storage solution by adding a second Fleet Frame.

#### **DURABLE FINISH**

Fleet's Solid Surface bench top is non-porous and stain resistant with a soft matt, clean white finish. A solid surface bench top is essential to any Fleet vanity and includes a subtle 5mm overhang to create a full width cabinet.

Subtle detailing and smooth, straight edges feature in the range of Fleet handles. Available in a range of brushed metallic Finishes to compliment your tapware. Customise your Fleet Further by adding your own bench top, any style of pull handles and top mount basins.

#### FRAME EXAMPLES

#### DRAWERS AVAILABLE

Note: the drawers can be positioned anywhere within the frame eg. offset - before fixing in place.

450mm 857mm 1157mm

Athena has been designing vanities for New Zealand homes since 1982. We evolve with changing design trends to provide an inspiring selection of vanity, furniture and mirror choices to suit varying design styles.

#### **VANITY TOPS**

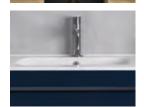

Sirocco stone bench tops deliver an everlasting sense of luxury and style.

Select from the clean, contemporary look of Caesarstone in Snow, Sleek Concrete, Frosty Carrina and Vanilla Noir for a surface of natural beauty. Engineered Stone is a composite slab made up of around 95% crushed Quartz stone bound. See page 24 for further details.

Athenite basins are made from premium solid surface material cast from natural minerals and acrylic polymer.

Basins are non-porous, stain resistant and the end result presents a silky gloss or matt finish that feels warm to the touch.

Vitreous China (or VC) has a classic appearance with its solid glassy Pinish. VC products offer excellent heat, scratch, stain and wear resistance.

Made from a natural material it is a cast ceramic (clay) glazed with enamel (glass). Due to the nature of its production, visible imperfections are part of the overall look of VC meaning no two tops are produced the same.

Composite tops and basins have a gloss surface that achieves a clean smooth look almost free from surface imperfections.

Tops are resistant to impact damage and offer good dimensional stability. Composite tops are created using a mixture of resin and mineral fillers with a hardwearing gel coat top surface.

Solid surface bench tops and basins are made from acrylic resin composite which is a durable and recyclable material.

The soft, matt white surface completes your Athena vanity while being non-porous and providing an impact, temperature and stain resistant finish.

#### **CABINETS**

Athena cabinets are manufactured in New Zealand from sustainably managed, low emission New Zealand produced board.

Board used in the construction of Athena vanities uses only low emission E1 standard (or better) board. New Zealand's board (MDF and Particle board) is regarded as the best in the world and is sourced from sustainably managed forest plantations.

Athena colour finishes are extremely high quality. Compared to wood veneer, and paint, they will resist bumps and knocks more readily and are more likely to maintain their as new finish over time as paints and lacquers tend to dull with ongoing exposure to UV.

#### SOFT CLOSING DOORS AND DRAWERS

Soft closing doors and drawers systems are specified on all Athena cabinets which deliver precision closing and reduce both noise and impact damage.

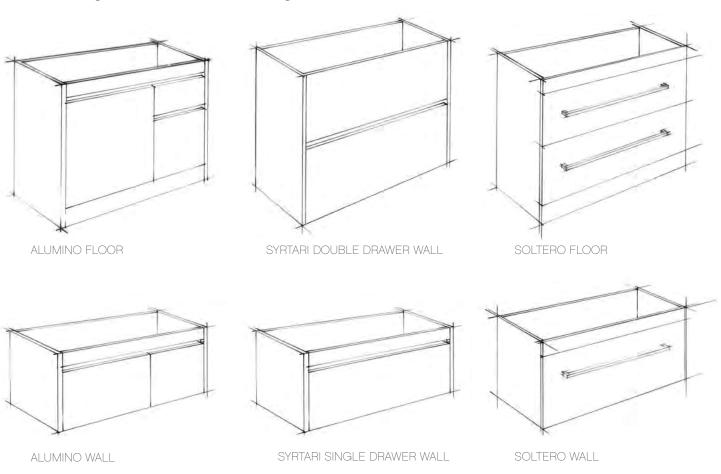

#### INTERNAL DRAWERS

Soltero Wall cabinets in the CREATE range feature internal drawer compartments to provide a functional storage solution while maintaining a sleek, uncluttered external appearance.

# CREATE Vanity Range

# select your cabinet style

Offering the freedom of personal expression.

The Create vanity range by Athena allows you to hand pick each component of your vanity to develop a personalised look that will complement and enhance your bathroom design. Select from various top designs, cabinet styles and cabinetry and handle colour finishes to best reflect your personal style.

# select your cabinet finish

# select your handle colour finish

Comes standard with Brushed Nickel. Not required for Alumino or Syrtari vanities

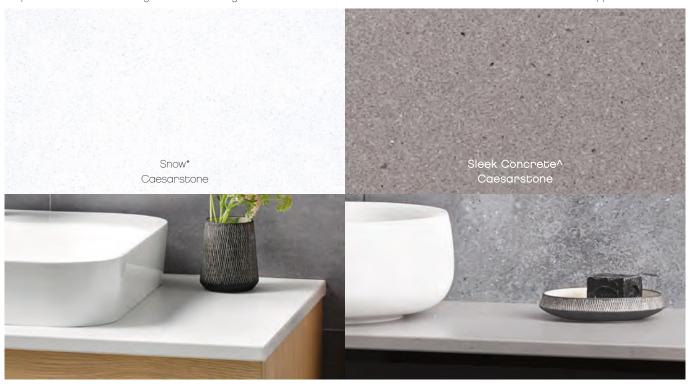

# SIROCCO BENCH TOP Finishes

#### STANDARD - 20mm top thickness

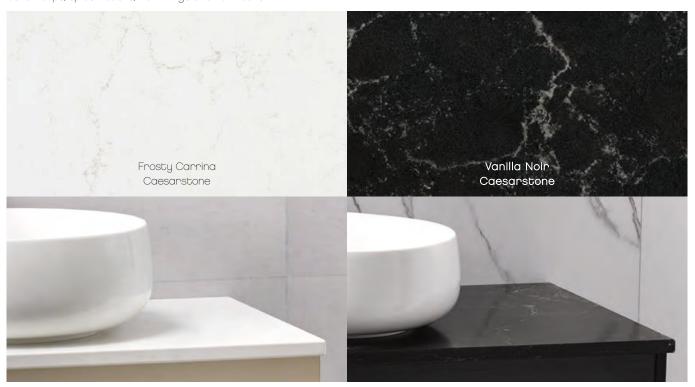

Caesarstone quartz surfaces offer numerous advantages over other types of surface materials. Combining the beauty and strength of quartz, one of nature's strongest minerals, Caesarstone retains the cool tactile qualities of natural stone while offering superior stain, mould and mildew resistance due to its non-porous nature. Caesarstone surfaces offer four times the flexural strength and double the impact resistance of granite and never require surface sealing, delivering a sleek and modern aesthetic with minimal maintenance required. The natural beauty and functionality of Caesarstone surfaces make them ideal for kitchen and bathroom applications.

\* Whilst Snow is predominantly white it may contain small dark particles
^Caesarstone Sleek Concrete finish creates an authentic industrial patina which doesn't disguise marks as easily as the polished finish.

### SUPERNATURAL - 20mm top thickness

For a small premium over the standard Sirocco bench tops you can upgrade to Supernatural Pinishes. Inspired by some of the world's most beautiful natural marble, Caesarstone's supernatural designs represent some of the newest additions to the collection. The supernatural designs have all the stain, scratch and water resistance qualities of quartz, making them ideal for bench tops, splash backs, wall linings and furniture.

## BATH WALL

2 and 3 sided acrylic wall available for Solace and Liquid baths

Available Flat or with optional soap recess which is integrally moulded into the acrylic wall lining for easy cleaning (1800 3 Walls – Flat wall option only)

Made from premium quality Senosan® acrylic capped ABS which provides an easy to clean gloss surface

Custom length walls available on request

Optional Moulded Soap Recess

#### OPTIONAL UPSTAND

Optional factory fitted 15mm aluminium upstands are recommended in shower over bath situations. The upstands enable a water tight seal between the bath and wall lining or tiles allowing the installer to apply the sealant above the baths surface, preventing a visible seal that can discolour or mould.

#### **FRAMES**

Liquid and Solace baths have the option of being supplied with a timber frame which is factory fitted to the bath to support the bath floor so no additional support is required on the underside. Timber bath frames are made from machined gauge pine which is straight and true to allow easy fixing of lining materials.

This is a cost effective solution which saves time onsite by eliminating the need to frame up once the product has been delivered.

Note: Frames are factory fitted and cannot be supplied separately.

ShowerMaster products are designed with kiwi homes in mind, featuring a range of cleaning, storage and design solutions to enhance your bathroomware. For specifications visit athena.co.nz - Spare Parts
