NEBL

Michael Rem, 2017

Type Flowerpot

Variants Mega

Colours Black or Grey

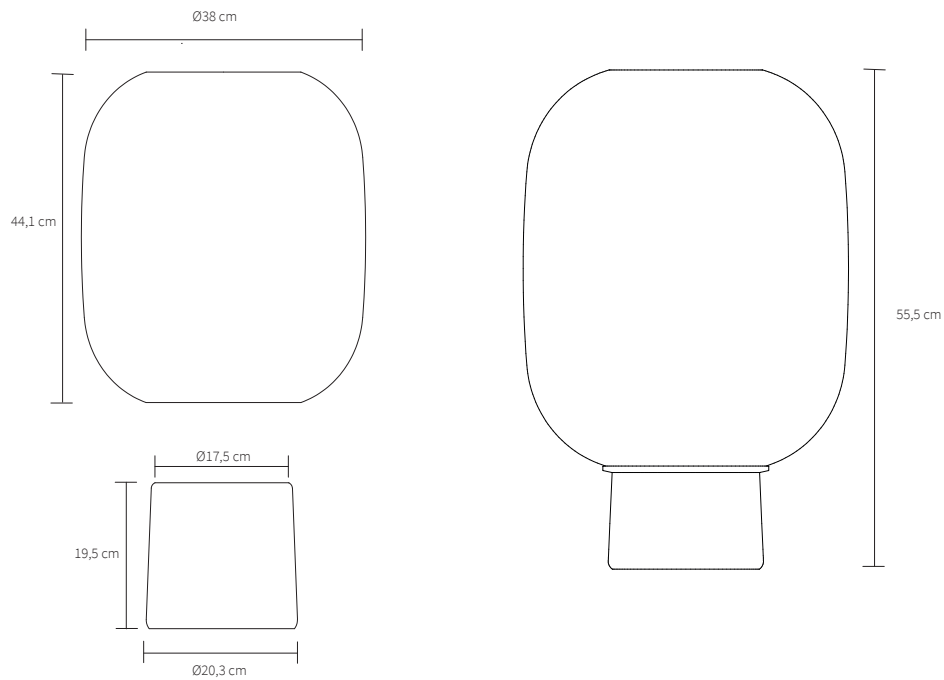

Nebl flowerpot mega is an intuitive and innovative flowerpot, that salutes unity and simplicity. Nebel is the German word for “fog” and this exact meteorological phenomenon is the main source of inspiration for designer Micheal Rem.

Nebl flowerpot mega is a planter with character. The distinctive design and the matte finish of the glass adds an exclusiveness and tactility to Nebl, that makes it hard not to get intrigued.

Nebl flowerpot mega consists of two parts: A ceramic base in which the plant is placed, and a frosted glass that is placed on the base. The glass has two openings with different sizes, which makes it possible to place the glass either high or low on the base.
