- All-Natural, Chemical Free, Non-Toxic
- Light Gel

Benefits

- Eliminate all types of Drain Flies
- Safe for all types of Plumbing & Septic Systems
- Eliminates Drain Odors & Keeps Pipes Clean

EcoStrong We believe that there are better alternatives to the typical chemical products we've grown up with. At EcoStrong®, our philosophy is simple: design products that will outperform the competition, never cut corners, and never damage the environment in the process of achieving our goals. We understand the needs of our products—they must do the job they are designed for. EcoStrong is putting biology to work on things to solve problems that used to just get covered up, sterilize or rinse away. While you can throw all kinds of things at the problem, we have natural and sustainable. Something we can all feel good about.

EcoStrong's Drain & Fruit Fly Eliminator will eliminate all types of flies that live and breed in drains, pipes and garbage disposals.

We destroy the fly's breeding and development habitat (known as drain scum or bio film). Packed with billions of all-natural enzyme producing bacteria with additional scum smashing enzymes, we destroy the flies home. With no place to stay, the flies go away!

Our product is unlike other drain fly products. Most are a mixture of soap, water and thickener with citronella. Our bio enzymatic formula **ATTACKS** and eats everything it comes in contact with, while doubling in strength every 20 minutes. Not only are flies gone, so are drain odors and the active biology keeps pipes clean and running freely.

EcoStrong's Drain & Fruit Fly Eliminator is an all-natural gel which is safe for all types of plumbing.

Works as advertised, no more drain flies. Apart from the flies we always had a bit of a funky smell around the sink and never thought much of it. Well that is gone as well. The product itself smells a bit like burning grass mixed in with Whisky, I like it but I guess the flies don't....

It took us a while to really figure how to fix these fruit flies! Nothing worked. We tried all kinds of traps and even the Green Gobbler stuff a couple of times. One of our friends told us about how great the ecostrong stuff was but we were obviously pretty skeptical. I am sure glad we tried it though because it worked great! One word of advise though...these flies can come out of any drain so make sure you treat your floor drains and sink drains to get them all.

Have been battling tiny fruit flies (that fly in front of my face while I'm on video conferences). One treatment and the issue has disappeared. Treated our kitchen, and bathroom drains. Who knew these things were coming from the drain!?!)

 Sara Harrell

★★★★★ **OMG this stuff really works**

Finally, my kitchen drain is clean and clear of those little fruit flies that drive me nuts. In the past year I've spent way too much money and time on other products that promise to be the end all solution for nasty drain problems, only to be disappointed with the results. Now I feel really good about hosting the holidays at my house for my kids and grandkids. EcoStrong Drain & Fruit Fly Eliminator got it done for me!

| Active Ingredients: | |
|---|----------------|
| Decomposition (CAS# 80020-70-2) | 35.00% |
| Citronellol oil (CAS# 80000-53-2) | 1.00% |
| Inert Ingredients: | |
| Water (CAS# 7732-18-5), Xanthan gum (CAS# 11188-66-2), Glycolol monoacetate (CAS# 111-95-5) | 89.00% |
| Total: | 100.00% |

Directions for use

Shake vigorously before using. The use of boiling water, bleach, anti/bacterial, or chemicals will negatively impact performance.

Always treat at low flow times such as before bed. Ideally the drain or sink will not be used for six hours after treatment.

SINKS & DRAINS: For best results fill the sink full of water and drain quickly. We are trying to wash food partials and debris through the pipes before treatment. Simply pour 4 oz of product down the drain using the attached 4 oz measuring cup, every 24 hours, until flies disappear. Use weekly as a prevention plan.

GARBAGE DISPOSALS: For best results fill the sink up with water. Once full remove the stopper and turn the disposal on, let completely drain and turn off. We are trying to wash as much food partials and debris away before treatment. Turn on the Disposal and pour 4oz of product in using the attached 4 oz measuring cup. Turn off disposal. Treat every 24 hours until flies disappear. Use weekly as a prevention plan.
