

## Drain & Grease Trap Treatment

### Where to Use

- Restaurants
- Commercial Kitchens
- Hotels
- Hospitals
- Food Manufacturer

### Features

- Rapidly Breaks Down & Digests FOGs
- Eliminates Drain & Grease Trap Odors
- All-Natural, Chemical Free.

### Benefits

- Reduces Pumpout Costs
- Provides an Odor-Free Workplace
- Eliminates Clogged Drains

**EcoStrong** We believe that there are better alternatives to the typical chemical products we've grown up with. At EcoStrong®, our philosophy is simple: design products that will outperform the competition, never cut corners, and never damage the environment in the process of achieving our goals. We understand the needs of our products—they must do the job they are designed for. EcoStrong is putting biology to work on things to solve problems that used to just get covered up, sterilize or rinse away. While you can throw all kinds of things at the problem, we have natural and sustainable. Something we can all feel good about.

Nothing brings a kitchen to a screeching halt faster than a clogged drain or grease trap. Allowing grease build-up in pipes and grease traps invites excessive plumbing costs, local FOG (fats, oils & grease) program fines, plumbing backups, unpleasant odors, EPA wastewater fines, drain flies, and more.

**EcoStrong's Drain & Grease Trap Treatment** meets the challenging needs of high grease applications. Our multi-strain bacterial formula rapidly breaks down and digests FOGs, starches, proteins and other food waste that builds up in drains and grease traps.

Like most of the equipment in a kitchen, the drains and grease trap require regular maintenance. **EcoStrong's Drain & Grease Trap Treatment** is a daily use treatment. To ensure optimal results, use with an automatic dosing pump. When treated with an automatic pump, **EcoStrong's Drain & Grease Trap Treatment** has been shown to increase pump-out intervals by as much as 300%.

We also offer two different automatic dosing pumps. These pumps are high quality, accurate, dependable and easy to use. You can choose either a battery-operated pump or a 120-volt option. These pumps will provide the highest degree of dosing certainty both in terms of consistency and timing.

**DIRECTIONS FOR USE:**  
**SHAKE VIGOROUSLY BEFORE EVERY USE.** Always treat at low times such as overnight. Do not use other chemicals with this product.

**DRAINS:**  
**FOR SLOW & SMELLY DRAINS:** Pour 4 to 6 ounces into drain and run warm water for a few seconds. Treat nightly for one week or until the flow returns to normal.  
**MAINTENANCE:** Each week pour 2-4 ounces into drain and run warm water for a few seconds.

**GREASE TRAPS:** Every grease trap is different and dosing levels should be used as a starting point. Increase or decrease dosing amounts based on results. Pour liquid into a drain closest to the trap, nightly or at low flow times. When using an auto-feed option always feed into the line as close to the trap as possible.

**SMALL TRAPS** (below 500 gallons) 8 to 10 ounces nightly.  
**LARGE TRAPS** (above 500 gallons) 18 to 20 ounces nightly.

**INGREDIENTS**  
 Water, bio-surfactants, enzyme producing bacteria, odor counteractant.

## Drain & Grease Trap Treatment

### Professional Strength

-  Naturally Maintain Your Trap & Drains
-  Reduces Pump-Outs
-  Added Odor Elimination Technology

EcoStrong's Drain & Grease Trap Treatment meets the challenging high-grease demands found in all commercial kitchen grease traps and drains. Our formulation contains the most effective combination of biological strains, which legally convert grease trap fats, oils, and grease into water and CO<sub>2</sub>.

Regular use of EcoStrong's Drain & Grease Trap Treatment will keep all downstream plumbing running free and clear. Containing billions of beneficial bacteria, our formulation, when used in conjunction with a septic system, will help aid in overall system health.

**TWO-IN-ONE FUNCTION.** EcoStrong's Drain & Grease Trap Treatment also contains our highly effective odor counteractant technology. This unique feature helps to quickly eliminate odors found in grease traps, drains and garbage disposals. The odor counteractants work in harmony with our biology, offering the most complete and rapid odor-elimination possible.

EcoStrong's Drain & Grease Trap Treatment does not contain any free enzymes or surfactants which will bypass the grease trap and push grease into the wastewater lines. Bypassing the grease trap with any of these additives is against most state and local laws.
